1 Your All In One Cooker
Congratulations on your purchase, and welcome to Philips!
To fully benefit from the support that Philips offers, register your product at www.philips.com/welcome.

2 Important

Safety
Read this user manual carefully before you use the appliance, and save it for future reference.

Danger
- The appliance must not be immerced.

Warning
- Check if the voltage indicated on the appliance corresponds to the local power voltage before you connect it.
- The appliance is intended to be used in household or similar applications such as:
  - Farm houses;
  - by clients in hotels, motels and other residential type environments;
  - bed and breakfast type environments.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.
- If the power cord set is damaged, it must be replaced by a cord set available from the manufacturer.
- Don’t place the power cord under the appliance when in use.
- The appliance is not intended to be operated by means of an external timer or a separate remote-control system.
- The ducts in the appliance are not blocked.
- Do not use the appliance if too much air or steam is leaking from under the top lid.
- When pressure is being released from the steam vent position, otherwise liquid might spurt from the pressure regulator valve. Wait until the pressure is naturally released and the floating valve has dropped to open the top lid.

Caution
- Never use any accessories or parts from other manufacturers or that Philips does not specifically recommend. If you use such accessories or parts, your guarantee becomes invalid.
- Do not expose the appliance to high temperatures, nor place it on a working or still hot stove or cooker.
- Do not expose the appliance to direct sunlight.
- Place the appliance on a stable, horizontal, and level surface.
- Do not use the handle on the top lid to move the appliance, use the side handles instead.
- When pressure is being released from the pressure regulator valve, hot steam or liquid will be ejected. Keep hands and face away from the steam vent.
- Always put the inner pot in the appliance before you put the plug in the power outlet and turn the control knob with wet hands.
- Make sure the power socket is clean and dry before you plug in the appliance.
- Do not use the appliance if the plug, the power cord, the inner pot, the sealing ring, or the main body is damaged.
- Do not let the power cord hang over the edge of the table or worktop on which the appliance stands.
- Make sure the heating element and the outside of the inner pot are clean and dry before you put the plug in the power outlet.
- Do not plug in the appliance or turn the control knob with wet hands.
- Make sure the power socket is clean and dry before you plug in the appliance.
- Do not use the appliance if too much air or steam is leaking from under the top lid.
- When cooking soup or viscous liquid, do not release pressure by turning the pressure regulator to the steam vent position, otherwise liquid might spurt from the pressure regulator valve. Wait until the pressure is naturally released and the floating valve has dropped to open the top lid.

3 by clients in hotels, motels and other residential type environments;
The accessible surfaces may become hot when the appliance is operating. Take extra caution when touching the surfaces.

- Beware of hot steam coming out of the floating valve and pressure regulator valve during cooking or when you open the lid. Keep hands and face away from the appliance to avoid the steam.
- Do not lift and move the appliance while it is operating.
- Do not exceed the maximum water level indicated in the inner pot to prevent overflow.
- Do not place the cooking utensils inside the pot while cooking.

Only use the cooking utensils provided. Avoid using sharp utensils.

- To avoid scratches, it is not recommended to cook crustaceans and shellfish. Remove the hard shells before cooking.
- Do not place a magnetic substance on the lid. Do not use the appliance near a magnetic substance. Always let the appliance cool down to room temperature before you clean or move it.
- Always clean the appliance after use. Do not clean the appliance in dishwasher.
- Always unplug the appliance if not used for a longer period.
- If the appliance is used improperly or for professional or semi-professional purposes, or if it is not used according to the instructions in this safety leaflet, the guarantee becomes invalid and Philips refuses liability for any damage caused.

Electromagnetic fields (EMF)
This Philips appliance complies with all applicable standards and regulations respecting electromagnetic fields.

Preparations before cooking (fig. 2)
1. Hold the lid handle and turn it anti-clockwise up to the top lid cannot move any more, then lift up the top lid.
2. Take out the inner pot from the All In One Cooker and fill it with the meat/food you are going to cook in the inner pot.
3. Wipe the outside of the inner pot dry, then put it back into the All In One Cooker.
4. Place the top lid onto the All In One Cooker and turn it clockwise. You will hear a ‘click’ sound when the top lid is properly locked.

Cooking food (fig. 3)
Note
- To cook with normal pressure, press the Sauté/sear button and choose Slow-cook. Sauté/ sear. Stew. Yogurt or Bake.

Pressure cooking (fig. 4)
1. Press the Sauté/sear button.
2. Turn the pressure regulator to Bake or seal.
3. Keep the inner lid properly closed.
4. Press the Start/Reheat button to start the cooking process.
5. The power indicator starts flashing.
6. Press the Start/Reheat button to confirm the pressure time.
7. The All In One Cooker starts working automatically.

Preparation time for delayed cooking (fig. 4)
1. Press the Sauté/sear button.
2. Turn the pressure regulator to Bake or seal.
3. Keep the inner lid properly closed.
4. Press the Start/Reheat button to start the cooking process.
5. The power indicator starts flashing.
6. Press the Start/Reheat button to confirm the pressure time.
7. The All In One Cooker starts working automatically.

Baking recipe
Apple cake with hazelnuts
Ingredients
- 175 g margarine
- 100 g flour
- 1/3 cup baking powder
- 100 g almond meal
- 3 medium eggs
- 80 g of maple syrup
- 2 medium apples, peeled, cored and cut into slices

Procedure
Grease the base and slides of the inner pot, mix the margarine with sugar, add the eggs and mix thoroughly. Add the flour, baking powder and almond meal, mix until the mixture is creamy. Fold with maple syrup. Grease the rest of the bottom of the inner pot, add the mixture and smooth the top of the mixture with level flat finish. Place the apples on top, pushing them slightly into the mixture. Sprinkle with cinnamon.

Normal cooking
Note
- For normal cooking, you can cook food without adding water in the inner pot. In this case, make sure to turn the pressure regulator to Bake or seal.

Cleaning and Maintenance
- Unplug the All In One Cooker before starting to clean.

Interior
- Inside of the top lid and the main body
- With the lid out and damp cloth
- Make sure to remove all the food residues stuck to the All In One Cooker Housing element.
- Wipe with wet or damp cloth
- Remove food residues with wetting out and damp cloth
- Sealing ring
- Soak in warm water and clean with sponge

Exterior
- Surface of the top lid and outside of the main body
- Wipe with a cloth dampened with soap water
- Only use soft and dry cloth to wipe the control panel
- Make sure to remove all the food residues around the pressure regulator valve and floating valve

Pressure regulator valve and floating valve
- Disassemble the pressure regulator, soak it in warm water, and clean with sponge
- Remove food residues in the pressure regulator valve and floating valve

9 Troubleshooting
If your All In One Cooker does not function properly or if the cooking quality is insufficient, consult the table below.
If you are unable to solve the problem, contact a Philips service center or the Consumer Care Center in your country.

Problem
I have difficulties opening the lid after cooking.

Cause
- Need to release the pressure

Solution
- Set the pressure regulator valve to ‘Vent’. And wait until the floating valve has dropped.

I have difficulties closing the lid.

Solution
- Make sure the sealing ring is well assembled around the inside of the top lid.

Leaking from under lid

Food or debris under lid
- Lid not correctly closed
- Open and reclose the lid, checking for correct closing.

Leaking from floating valve

- Floating valve stuck in up position
- Floating valve stuck in up position
- Floating valve stuck in up position
- Put sealing ring in place correctly on inner lid

Leaking from sealing ring

- Seal & ridge broken
- Remove the sealing ring
- Replace the sealing ring

Assembling and disassembling the pressure regulator
During cooking, do not disassemble the pressure regulator during cooking.
Always unplug the All In One Cooker and wait until the pressure has been released in order to disassemble the pressure regulator.

1. Press the Start/Reheat button to start the cooking process.
2. The pressure indicator starts flashing.
3. Press the Start/Reheat button to confirm the pressure time.
4. The All In One Cooker starts working automatically.

Warning
- Do not disassemble the pressure regulator during cooking.
- Always unplug the All In One Cooker before starting to clean.
- Wait until the All In One Cooker has cooled down sufficiently before cleaning it.

Thank you for choosing Philips.
