1 Your electric pressure cooker

Congratulations on your purchase, and welcome to Philips!
To fully benefit from the support that Philips offers, register your product at www.Philips.com/welcome.

2 Important

Safety

Read this user manual carefully before you use the appliance, and save it for future reference.

- The appliance must not be immersed.
- The appliance is not intended to be used in household or similar applications such as: staff kitchen areas in shops, offices, and other residential type environments.
- Check if the voltage indicated on the appliance corresponds to the local power voltage before you connect it.
- The appliance is intended to be used in household or similar applications such as: staff kitchen areas in shops, offices, and other residential type environments.
- If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
- The appliance is not intended to be operated by means of an external timer or a separate remote-control system.
- The ducts in the pressure regulator allowing the escape of steam should be checked regularly to ensure that they are not blocked.
- The container must not be opened until the pressure has decreased sufficiently.
- Cleaning and user maintenance shall not be made by children.

Caution

- Never use any accessories or parts from other manufacturers or that Philips does not specifically recommend. If you use such accessories or parts, your guarantee becomes invalid.
- Do not expose the appliance to high temperatures, nor place it on a working or still hot stove or cooker.
- Do not expose the appliance to direct sunlight.
- Place the appliance on a stable, horizontal, and level surface.
- Do not use the handle or a separate remote-control system.
- When pressure is being released from the pressure regulator valve, hot steam or liquid will be ejected. Keep hands and face away from the steam vent.
- Do not put the inner pot in the appliance before you put the plug in the power outlet.
- Always put the inner pot directly over an open fire to cook food.
- Do not use the inner pot if it is deformed.
- Make sure that the sealing ring is clean and in good condition.
- The accessible surfaces may become hot when the appliance is operating. Take extra caution when touching the surfaces.
- Beware of hot steam coming out of the floating valve and pressure regulator valve during cooking or when you open the lid. Keep hands and face away from the appliance to avoid the steam.
- Do not lift and move the appliance while it is operating.
- Do not exceed the maximum water level indicated in the inner pot to prevent overflow.
- Do not place the cooking utensils inside the pot while cooking.
- Only use the cooking utensils provided. Avoid using sharp utensils.
- To avoid scratches, it is not recommended to cook ingredients with crustaceans and shellfish. Remove the hard shells before cooking.
- Do not place a magnetic substance on the lid. Do not use the appliance near a magnetic substance.
- Always let the appliance cool down to room temperature before you clean or move it.
- Always clean the appliance after use. Do not clean the appliance in dishwasher.
- Always unplug the appliance if not used for a longer period.

If the appliance is used improperly or for professional or semi-professional purposes, or if it is not used according to the instructions in this safety leaflet, the guarantee becomes invalid and Philips refuses liability for any damage caused.

4 Using the electric pressure cooker

Before first use

1. Remove all packaging materials from the appliance.
2. Make sure all the accessories from the inner pot.
3. Clean the parts of the electric pressure cooker thoroughly before use or after the first time (see chapter Cleaning and Maintenance).

Note

- Make sure all parts are completely dry before you start using the electric pressure cooker.

Preparations before cooking (fig. 2)

Before using the electric pressure cooker to cook food, follow these steps before cooking:

1. Hold the lid handle and turn it anti-clockwise until the top lid cannot move any more, then lift it up.
2. Take out the inner pot from the electric pressure cooker and put the pre-washed food in the inner pot.
3. Close the lid.

Pressure cook

- Make sure that the sealing ring is properly assembled around the edge of the detachable inner lid.
- Make sure the pressure regulator valve and floating valve are clean and not blocked. Make sure the outside of the inner pot is dry and clean, and that there is no foreign residue on the heating element.
- Make sure the inner pot is in proper contact with the heating element.

Normal cooking

To cook food with normal pressure, press the cooking buttons and choose Slow cook, Sauté/Sear, Slow, Yogurt, or Bake.

1. Follow the steps in ‘Preparations before cooking’.
2. Press the pressure regulator to Bake or seal.
3. Press the cooking mode button.
4. Press the desired cooking function button to choose the cooking mode.
5. To set a different cooking time, press the cooking time button.
6. To change the pressure keeping time, press the pressure keeping time button.
7. Press the start button or Sauté/Sear button.

Pressure cooking functions

- The pressure cooker automatically switches to keep warm or standby mode.
- When the pressure cooker is over heated, the electric pressure cooker automatically switches to keep warm or standby mode.
- The default pressure keeping time is displayed on the screen.

Preparation time for delayed cooking (fig. 4)

You can set the delayed cooking time for different cooking functions. The preset timer is available up to 24 hours.

1. After the cooking function is selected, press the preset time button.
2. The hour unit starts flashing on the display.
3. Press Start/Reheat to confirm the preset time.
4. The minute unit starts flashing on the display.
5. Press Start/Reheat to confirm the preset time.
6. Press Start/Reheat to start the cooking process.

Note

- The pressure is naturally released and the electric pressure cooker automatically switches to keep warm or standby mode.
- The preset function is not available in the following modes: Slow cook (both low and high temperatures), Reheat, Manual and Warm.

5 Cleaning and Maintenance

Precautions

- Turn the appliance to a Philips service center.

Accessories

- Measuring cup, rice spoon, soup ladle, and inner pot.
- Soak in hot water and clean with sponge.

Specifications

- Model Number: HD2187
- Rated power output: 1050W
- Rated capacity: 6L
- Warm keeping temperature: 50°C ± 5°C

Note

- Always unplug the appliance if not used for a longer period.

Environment

- Do not throw away the product with the normal household waste at the end of its life. Hand it in at an official collection point for recycling. By doing this, you help protect the environment.

8 Guarantee and service

If you need service or information, or if you have a problem, visit the Philips website at www.philips.com or contact the Philips Customer Care Center in your country. You can find these numbers on the worldwide guarantee leaflet. If there is no Customer Care center in your country, go to your local Philips dealer.

9 Troubleshooting

Apple cake with hazelnuts

Ingredients:
- 250g margarine
- 90g flour
- 60g sugar
- 3/4 tsp.baking powder
- 1 tsp.baking soda
- 1/4 tsp.cinnamon
- 250g milk
- 300g fruit
- 1 egg

Baking recipe

1. Preheat the oven to 190°C.
2. Grease a 25 cm cake tin with butter and line the bottom with baking parchment.
3. In a large mixing bowl, cream the margarine and sugar until light and fluffy.
4. Add the flour, baking powder, baking soda, cinnamon, eggs, and milk and mix until smooth.
5. Fold in the fruit and spread the mixture into the prepared tin.
6. Bake at 190°C for 40-45 minutes or until a skewer inserted into the center comes out clean.

Assembling and disassembling the pressure regulator

Warning

- Do not disassemble the pressure regulator during cooking. Always unplug the electric pressure cooker before and after the cooking process, or the pressure has been released sufficiently to do so.
- To disassemble the pressure regulator:
- Turn the lower screw anti-clockwise until it becomes loose.
- Pull it up and take out the pressure regulator.
- To assemble the pressure regulator:
- Place the lower screw back to the regulator.
- Make sure the regulator points at the sealed position (✓) and pull it back to the stem valve.
- Turn the screw clockwise until it is tightened.
