Hot drink with a twist

Kettle with variable temperature control

Every hot drink requires a certain temperature, ranging from ready-to-sip drinks to boiling. Simply select the temperature you require by turning the control knob, and enjoy your perfect instant coffee, instant noodles, green or black tea.

Advanced

- Variable temperature control to prepare various drinks
- Double Action filter for clear water and a cleaner kettle
- Flat heating element for fast boiling and easy cleaning

Safe to use

- Hinged locking, cool lid for optimal safety
- Precision spout without splashing hot water
- Automatic shut-off in case of too little water

Easy to experience

- Pilot light illuminates when kettle is switched on
- Two sided water level indicators for left & right handed use
- Pirouette 360° center connector for left and right handed use

Highlights

Variable temperature control

Every drink requires a specific water temperature to realise the best end result. By turning the temperature control knob, the temperature level of the water can be influenced. Making sure the basic ingredient for your tea, instant coffee, soup or noodles is at the temperature you like.

Double action anti-scale filter

The Double Action filter works two ways: a scale collector attracts scale from the water, and the regular filter prevents the remaining particles from being poured into your drink.
