

Philips Senseo® Viva Café

The Philips SENSEO® Viva Café pod machine has a unique brewing system for optimal taste and temperature and is tested >10.000 times to ensure consistent quality. Thanks to the wide set of features like 1 or 2 cups at a time, adjustable real metal spout and direct start, you can enjoy the ultimate SENSEO® experience every time.

The automatic shut-off avoids unnecessary energy consumption. The plastic in contact with water and coffee is free of bisphenol A. The cardboard packaging material contains a minimum of 90% recycled content. The plastic housing of the SENSEO Viva Café contains up to 112 gram recycled plastic.

Our eco passport

Philips wants to make the world healthier and more sustainable. To make this a reality, we have to keep thinking differently; pushing the boundaries of what is currently believed possible. We continuously innovate and deliver products and technologies that are positive for people and the environment. At Philips we call this Green Innovation.

We know this is important to you too. So we have developed an eco passport which explains the environmental performance of our products in the six Philips Green Focal Areas, developed through our eco design process since 1994, enabling you to make conscious, informed decisions. An eco passport will explain the Green Focal Areas considered and applied in the specific product.

 <h3>Energy</h3> <ul style="list-style-type: none"> • Max power consumption: 1450W • Annual energy consumption: 110kWh* • Standby energy consumption: 0.2W • Automatic shut off: yes 	 <h3>Packaging</h3> <ul style="list-style-type: none"> • Minimal of 90% recycled cardboard paper • No use of polyvinylchloride (PVC), expanded polystyrene (EPS) in packaging
 <h3>Substances</h3> <ul style="list-style-type: none"> • Plastics in contact with water and coffee are free of bisphenol A (BPA) • The product is free of PVC (excluding the power cord) 	 <h3>Circularity</h3> <ul style="list-style-type: none"> • Contains up to 112 gram recycled plastic • Durability test: machine is tested for more than 10.000 cups of coffee

* Energy consumption measured according to IEC 60661. Based on daily usage, including warm up of device and brewing 4 cups of coffee.
