Exprelia

Integrated Milk Carafe

Stainless steel

HD8854/09

Perfect, hot, clean.

That's the premium milk experience

The Exprelia is always ready to serve your favourite coffee speciality. Thanks to the immediate beverage selection interface, whatever you choose is made at the touch of a button — and instantly prepared thanks to the machine's double boiler.

Authentic Italian coffee perfection

- Perfect milk froth thanks to the integrated milk carafe
- Milk specialities without the wait thanks to a double boiler
- Coffee without burnt taste thanks to 100% ceramic grinders

Set the beverages to suit your taste

- Save your favourite coffee settings
- Play with the coffee's richness with our adjustable grinders
- Boost coffee crema and body

Easy to clean and maintain

- Always a clean machine thanks to auto-clean and descaling
- Hygienic milk frothing thanks to automated dual cleaning
- Easy cleaning thanks to removable brewing group

Highlights

100% ceramic grinders

This espresso machine is equipped with 100% ceramic grinders. Saeco uses ceramic grinders because of their consistent grind without overheating the coffee bean, for an impeccable espresso. Ceramic also ensures long-lasting performance and totally silent operation.

8-step adjustable grinders

Different coffee blends require different levels of granularity for the full flavour to unfold. The grind granularity of this espresso machine can be adjusted in 8 settings, from the finest grind, for a full-bodied espresso, to the coarsest, for a lighter café crème.

Saves your coffee settings

You will always get a perfect cup of espresso brewed just for you, according to your personal preference, thanks to our innovative memo function for adjusting the coffee length, strength and temperature. Enjoy a superb coffee drink in your favourite cup at the touch of a button.

Removable brewing group

The brewing group, a Saeco invention, is the heart of our espresso machines, ensuring automation. The brewing group is, depending on the model, easily accessible from the front or side. It can be removed effortlessly for easy cleaning by rinsing under the tap, ensuring maximum hygiene.

Automatic dual-cleaning carafe

This Saeco espresso machine comes with a fully automated dual-clean function for its milk carafe. The dual cleaning uses two independent steam cycles to swiftly rinse your milk carafe after each coffee drink you prepare, for a fresh milk drink every time. Hygienic milk frothing has never been this easy.

Auto-cleaning and descaling

Saeco designed this espresso machine to automatically clean its coffee circuit with water when starting up or switching off to deliver a great, fresh taste with each cup of coffee. Regular descaling prolongs your espresso machine's life. This machine will not only

prompt when descaling is needed, the automated descaling process will start and guide you with clear on-screen messages when you have to intervene. Descaling has never been so easy!

Professional double boiler

With 2 separate heating systems to cater for both the optimal coffee temperature and the milk frothing temperature, this Saeco fully automatic espresso machine guarantees professional performance and speed every time. You are able to prepare as many latte macchiatos and cappuccinos as you wish, one after the other and each just as good as the previous one, without waiting.

Integrated milk carafe

Enjoy your milk specialities with the automated milk carafe with auto-clean. Simply pour milk into the carafe, plug it into the machine and select your preferred coffee drink. Whether it is a latte macchiato, cappuccino or caffelatte, your drink will be served within seconds. The carafe of your Saeco espresso machine conveniently comes with auto-clean, which means two automatic steam-rinsing cycles will clean your carafe's tubes after every use for a fresh milk taste every time.
