HER9012DG

The rechargeable receiver-in-the-ear hearing aid

Full day of power

With an integrated rechargeable battery and a contact-free charging system, Philips HearLink offers the modern convenience of rechargeability. Enjoy a full day of power, including streaming from smart devices and a short recharging period.

SoundMap technology

- SoundMap Noise Control
- SoundMap Amplification
- SoundMap Feedback Canceller

SoundTie technology

- Made for iPhone®, iPad®, iPod®
- Wireless accessories
- 2.4 GHz wireless technology

Highlights

Made for iPhone®, iPad®, iPod®

Philips HearLink hearing aids are Made for iPhone®, iPad® and iPod touch®. Sounds are streamed from these devices directly into your Philips HearLink hearing aids.

SoundMap Amplification

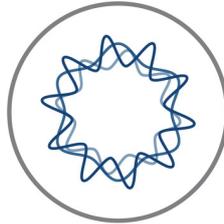

An advanced compression scheme with built-in noise estimation enhances the clarity and audibility of all the sounds that you have been missing out on, including speech.

SoundMap Feedback Canceller

A ground-breaking feedback canceller that is fast enough to detect and counteract the early build-up of acoustic feedback.

SoundMap Noise Control

Unique twin-microphone noise estimation accurately separates noise from speech. While the background noise is reduced, you can understand speech easier in noisy environments.

Wireless accessories

SoundTie technology connects you to your friends and family in far-flung places and to your favourite music and entertainment. Connect your calls from your Android™ smartphone via the Philips AudioClip. Or stream sound from superior sound systems and TVs via the Philips TV Adapter. And use the Philips Remote Control or the Philips HearLink app to discreetly change the hearing aid volume and programme.

2.4 GHz wireless technology

2.4 GHz Bluetooth® Low Energy allows direct wireless connection to devices with modern connectivity.

Specifications

Product description

Double push button: Volume and programme change, mute, flight mode

Telecoil: Available

miniFit speakers: 4 options with various earpieces

Coating: Hydrophobic

IP rating: IP68

Bluetooth®: 2.4 GHz BLE

NFMI: Available

Rechargeability

Hours of operation: Up to 24.7 hours (depending on usage)

Charging time: 3 hours to fully charged

Battery type: Lithium-ion
