- Original Philips EnergyLight lamps

### **Easy positioning for personal preference**

- Adjustable angle

### **Safe to use**

- UV-free

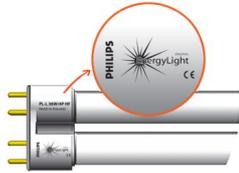

### **Proven health benefits**

- Supported by the Medical Device Directive (MDD)

# Highlights

## Original Philips EnergyLight lamps

The EnergyLight features original Philips EnergyLight lamps producing light with all the intensity and quality of natural daylight. In fact, it can give you up to 10,000 lux, but without any unpleasant dazzle or glare. If you use the EnergyLight for just 30 minutes a day (there's no need to stare into the lamp all the time) at a light intensity of 10,000 lux, you'll notice an improvement in your energy level and mood after just 5 days' use.

## Adjustable angle

The appliance can be positioned at various angles for comfortable use.

## UV-free

The EnergyLight uses the full natural daylight spectrum. It meets European safety standards and features a UV-filtering screen. The EnergyLight is therefore safe to use.

## Supported by the Medical Device Directive (MDD)

This device has proven health benefits, as certified by the Medical Device Directive (MDD).
