- Sunset simulation to fall asleep at ease
- The Wake-Up Light clinically proven to work

### **Glow in the dark buttons and print**

- Adjustable light for reading in bed

### **Customize the light with the included sticker set**

- Easy snooze on tap
- Select one of two beeps for wake up
- Designed for kids: glow in the dark elements & stickers

# Highlights

## Simulate natural sunrise

Inspired by nature's sunrise, light gradually increases within 30 minutes until the kids bedroom is filled with bright yellow light. This process of changing an increasing light stimulates the natural wake up. By the time light has filled the room one out of 2 beeps will wake your child so they are ready for the day ahead.

## Sunset simulation

The integrated sunset simulation program helps kids that want to fall asleep with light by gradually decreasing the light over 30 minutes.

## Bed side reading light

Light level preference is different for everyone. With 10 light intensities your child can personalize their brightness for reading or relaxing.

## Snooze

Tap the top of the light to stop the sound, leave the light on and start snooze. After 9 minutes the sound will gently start again.

## Wake up beeps

At the set wake-up time, your choice of two gentle beeps will play, increasing in volume, to help your child wake up.

## Glow in the dark and sticker

The Kids Wake-Up Light features a spaceship print on the light face and buttons glowing in the dark. Also, included sticker sets allow your kids to make their Wake-Up Light their own. We recommend to watch and support your kids as they decorate the light.

## Proven technology

Philips wake-up lights are clinically proven to improve your general wellbeing after waking up. Several independent studies have shown that our wake-up light improves the quality of waking up, improves your mood and makes you feel more refreshed in the morning. Ninety-two percent of adult users say our wake-up light wakes them up pleasantly, while 88% of users say that the wake-up light is a better way to wake up than how they did before.\*
