- Less overheating with Even Heat Distribution technology
- Cool air setting for gentle drying
- ThermoProtect temperature setting
- Ionic Care
- Less overheating with Even Heat Distribution technology

#### **Easy to use**

- Three flexible settings for more control

# Highlights

## Advanced EHD technology

Advanced Philips EHD technology means that your dryer uses an uniquely designed and keratin coated air outlet, to ensure heat is always distributed very evenly - even at high temperatures - and prevents damaging hot spots. This gives ultimate protection to the hair from overheating and thus helps to keep your hair healthy and shiny.

## Shine Ionic Care

Efficient anti-static, ion conditioning for shiny, frizz free hair.

## 1600W for gentle drying

This 1600W hairdryer creates the optimum level of airflow and gentle drying power, for beautiful results every day.

## Three flexible settings

The speed and heat required can be easily adjusted to create the perfect end result. Three flexible settings ensure precise and tailored styling.

## ThermoProtect temperature

The ThermoProtect temperature provides the optimal drying temperature and gives additional protection from overheating the hair. With the same powerful airflow, you will get the best results in a caring way.

## Cool air setting

A cold air setting is a low heat setting that gently dries the hair to minimize damage. This function is suitable for all hair types, but especially for fine, dry or damaged hair. It's a perfect setting for the hot summer season!
