PHILIPS

Highlights

1000W

This 1000W hairdryer creates the optimum level of airflow and gentle drying power, for beautiful results every day.

38mm thermo brush

The thermo brush has an extra wide diameter of 38mm. The width of the barrel makes it the perfect styling tool for creating smooth styles and waves.

Retractable bristle brush

This easy to use airstyler is both a styling brush and curler in one. The bristles retract into the brush at the touch of a button, so you can

easily slide the styler out of your hair. What's left is a beautiful bouncy curl.

Ionic Care

Ionic conditioning enables anti-static drying. Charged negative ions eliminate static hair, condition the hair and smooth down the hair cuticles to intensify the hair's shine and glossiness. The result is smooth and frizz-free hair that shines beautifully.

Narrow concentrator

The concentrator works by focusing the flow of air through the opening onto specific areas. This results in precise styling and is great for touch ups or to finish a style.

ThermoProtect temperature

The ThermoProtect temperature provides the optimal drying temperature and gives additional protection from overheating the hair. With the same powerful airflow, you will get the best results in a caring way.

Cool air setting

A cold air setting is a low heat setting that gently dries the hair to minimize damage. This function is suitable for all hair types, but especially for fine, dry or damaged hair. It's a perfect setting for the hot summer season!

Advanced EHD technology

Advanced Philips EHD technology means that the attachments are designed to distribute the heat evenly. This ensures heat is always distributed very evenly - even at high temperatures - and prevents damaging hot spots. This provides maximum protection to the hair from overheating and thus helps to keep your hair healthy and shiny.

Ceramic coated brushes

The brushes have a ceramic coating, to prevent overdrying. It helps spread the heat more evenly and avoids hot spots on the hair, which lead to overheating and overdrying of the hair.

Philips Green Logo

Philips Green Products can reduce costs, energy consumption and CO2 emissions. How? They offer a significant environmental improvement in one or more of the Philips Green Focal Areas – Energy efficiency, Packaging, Hazardous substances, Weight, Recycling and disposal and Lifetime reliability.

Specifications

Technical specifications

- Voltage: 220-240~ V
- Wattage: 1000 W

Attachments

- Nozzle: For a focused airflow
- Retractable bristle brush: For tangle free waves & curls
- Paddle straightening brush: For naturally straight looks
- Thermobrush: For smoothing and for waves
- Volumizer: For volume at the roots

Caring technologies

- Ceramic coating of brushes
- Ion technology
- Thermoprotect
- EHD technology

Ease of use

- Cable length: 2m
- Storage hook
