## Important

Read these instructions for use carefully before using the appliance and save them for future reference.

- ▶ Store and use the appliance at a temperature between 5°C and 35°C.
- ▶ Keep the appliance dry.

## Inserting batteries

The appliance runs on three R6 AA 1.5-volt batteries. Preferably use Philips alkaline batteries. Make sure that your hands are dry when inserting the batteries.

- 1** Slide the lid of the battery compartment backwards (1) and open it (2).

- 2** Put three batteries in the battery compartment.

Make sure the + and - indications on the batteries match the indications in the battery compartment.

- 3** Push the lid of the battery compartment down onto the appliance and slide it upwards to close it.

- ▶ To avoid damage due to battery leakage:
  - do not expose the appliance to temperatures higher than 35°C;
  - remove the batteries if the appliance is not going to be used for a month or more;

- do not leave empty batteries in the appliance.

## Shaving time

Three new batteries offer a shaving time of 60 minutes.

## Using the appliance

### Shaving

- 1** Switch the appliance on by pressing the switch lock (1) and pushing the on/off slide upwards (2).

► *The switch lock prevents accidental switching on of the appliance.*

- 2** Move the shaving heads quickly over your skin, making both straight and circular movements.

Shaving on a dry face gives the best results. Your skin may need 2 or 3 weeks to get accustomed to the Philips shaving system.

- 3** Switch the shaver off by pushing the on/off slide downwards.
- 4** Put the protection cap on the shaver every time you have used it, to prevent damage.

## Trimming (HQ422 only)

---

For grooming sideburns and moustache.

- 1** Open the trimmer by pushing the slide upwards.

The trimmer can be activated while the motor is running.

## Cleaning and maintenance

Regular cleaning guarantees better shaving performance.

- For easy and optimal cleaning, the Philips Action Clean (shaving head cleaner, type HQ100) is available. Ask your Philips dealer for information.
- *The Philips Action Clean may not be available in all countries. Contact the Customer Care Centre in your country about the availability of this accessory.*

You can also clean the shaver in the following way:

### Every week: shaving unit and hair chamber

---

- 1** Switch the shaver off.
- 2** Clean the top of the appliance first, using the brush supplied.

- 3** Press the release button (1) and remove the shaving unit (2).

- 4** Clean the inside of the shaving unit and the hair chamber with the brush.

- 5** Put the shaving unit back onto the shaver.

### Every two months: shaving heads

- 1** Switch the shaver off.

- 2** Press the release button (1) and remove the shaving unit (2).

- 3** Remove the retaining frame by pushing the sides of the central spring towards each other (1) and lifting the retaining frame out of the shaving unit (2).

- 4** Slide the shaving heads out of the retaining frame and clean them one by one.

Do not mix up the cutters and the guards.

This is essential since each cutter has been ground with its corresponding guard for optimal performance. If you accidentally mix the sets up, it could take several weeks before optimal shaving performance is restored.

- 5** Clean the cutter with the short-bristled side of the brush.

Brush carefully in the direction of the arrow.

- 6** Brush the guard.

- 7** Slide the shaving heads back into the retaining frame and put the retaining frame back into the shaving unit.

- 8** Put the shaving unit back onto the shaver.

For extra thorough cleaning, clean the shaving heads by putting them in a degreasing liquid (e.g. alcohol) every six months. To remove the shaving heads, follow steps 1 to 4 described above. After cleaning, lubricate the central point on the inside of the guards with a drop of sewing machine oil to prevent wear of the shaving heads.

## Trimmer (HQ422 only)
