Highlights

ProMix blending technology

The Philips handblender ProMix technology was developed together with the prestigious Stuttgart University. It is an advanced technology for more consistent and faster blending. The unique ProMix blending technology of Philips hand blenders uses a triangular shape to create an optimal flow and gives maximum performance making silky smooth soups and smoothies.

Titanium coated blade

This Philips hand blender has a blending knife which is coated with a Titanium layer (TiN). It makes the knife six times harder than regular stainless steel knives to ensure the performance over time. The shape of the knife is optimized to deliver with the ProMix triangular handblender blending bar the best blending results. It is food safe.

16-speeds and turbo

With 16 speed settings you can select the optimal speed for all type of ingredients creating the preferred consistency or smoothest blending results.
