No more hassle

- Automatic Speed Selection
- Dishwasher safe
- Easy press down operation
- Large 1.1l bowl
- Single cut needed

Versatility for daily use

- Coarse chopping with ChopDrop
- Fine chopping with HS blade

Highlights

Automatic Speed Selection

Philips OnionChef chopper is equipped with 2 speeds and automatic speed selection. The different functions require a different speed for achieving the optimal result - slow speed for the coarse chopping with ChopDrop technology and high speed for the fine chopping with the separate high speed blade. The product detects the desired function and adjusts the needed speed automatically to ensure achieving the desired end result every time.

Coarse chopping with ChopDrop

The Philips OnionChef chopper uses an optimal slow speed for its ChopDrop technology. This ensures you can always achieve dry and regular pieces of onion and other delicate ingredients, such as zucchini, boiled eggs, pepper, mozzarella, as well as hard ones - such as nuts, carrots and more. Ideal for your favourite daily dishes, as well as appetizers (salsa, tzatziki), sauces, risottos and more!

Dishwasher safe

The Philips OnionChef chopper is easy to clean. You can rinse clean all parts with water or simply place them in the dishwasher.

Easy press down operation

The activation of the Philips OnionChef cannot be any easier - simply press down the top of the product towards the bowl. No extra buttons, settings or switches. Chopping like a chef at a single touch.

Fine chopping with HS blade

Like any other chef, the Philips OnionChef chopper with its additional high speed chopping blade allows you also to achieve finely chopped result of a large variety of ingredients, such as meat, nuts, dried fruit, herbs, Parmesan, chocolate and more. Finely grind meat for steak tartare, meat balls, sauce Bolognese or tacos; prepare homemade pesto and humus, energy bars or simply a fresh dressing for your favorite salad.

Large 1.1l bowl

The Philips OnionChef chopper comes with a large 1.1L bowl. It allows you to prepare the necessary amount of your essential ingredients.

ChopDrop technology

Recognizing how unpleasant and difficult chopping onions is, Philips has cleverly developed ChopDrop technology to allow you to chop them like a chef in an easy way. The uniquely designed chamber keeps the onion in, while the three sharp blades are chopping. Once the pieces reach the optimal size, they are dropped in the bowl: dry & regular every time. Perfect for onions, but also other vegetables, fruit, cheese, nuts & more.

Powerful 300W motor

The powerful 300W motor of the Philips OnionChef chopper ensures you can chop even hard ingredients quick and easy.
