1 Important

Safety and important notice

Warning

- Risk of overheating! Never install the product in a confined space. Always leave a space of at least 4 inches around the product for ventilation. Ensure curtains or other objects never cover the ventilation slots on the product.
- Never place the product, remote control or batteries near naked flames or other heat sources, including direct sunlight.
- Only use this product indoors. Keep this product away from water, moisture and liquid-filled objects.
- Never place this product on other electrical equipment.
- Keep away from this product during lightning storms.
- Where the mains plug or an appliance coupler is used as the disconnect device, the disconnect device shall remain readily operable.
- Visible and invisible laser radiation when open. Avoid exposure to beam.

Recycle notice

This electronic equipment contains a large number of materials that can be recycled or reused if disassembled by a specialized company. If you are disposing of an old machine, please take it to a recycling center. Please observe the local regulations regarding disposal of packaging materials, exhausted batteries and old equipment.

Copyright notice

Be responsible Respect copyrights

This product incorporates copyright protection technology that is protected by method claims of certain U.S. patents and other intellectual property rights owned by Macrovision Corporation and other rights owners. Use of this copyright protection technology must be authorised by Macrovision Corporation, and is intended for home and other limited viewing uses only unless otherwise authorised by Macrovision Corporation. Reverse engineering or disassembly is prohibited.

About Progressive Scan

Consumers should note that not all high definition television sets are fully compatible with this product and may cause artifacts to be displayed in the picture. In case of 525 or 625 progressive scan picture problems, it is recommended that the user switch the connection to the ‘standard definition’ output. If there are questions regarding our TV set compatibility with this model 525p and 625p DVD player, please contact our customer service center.
Trademark notice

Manufactured under license from Dolby Laboratories. Dolby, Pro Logic and the double-D symbol are trademarks of Dolby Laboratories.

DivX, DivX Ultra Certified, and associated logos are trademarks of DivX, Inc. and are used under license.
Official DivX® Ultra Certified product.
Plays all versions of DivX® video (including DivX® 6) with enhanced playback of DivX® media files and the DivX® Media Format.
Plays DivX® video with menus, subtitles and audio tracks.

Manufactured under license under U.S. Patent #’s: 5,451,942; 5,956,674; 5,974,380; 5,978,762; 6,487,535 & other U.S. and worldwide patents issued & pending. 2 Your Home Theater System

Congratulations on your purchase, and welcome to Philips! To fully benefit from the support that Philips offers, register your product at www.philips.com/welcome.

Feature highlights

Philips EasyLink
Your Home Theater System supports Philips EasyLink, which uses the HDMI CEC (Consumer Electronics Control) protocol. EasyLink-compliant devices that are connected through HDMI connectors can be controlled by a single remote control.

Note
• Philips does not guarantee 100% interoperability with all HDMI CEC devices.

Philips Ambisound
Philips Ambisound technology reproduces multi-channel surround sound with fewer speakers to give an embracing surround experience without the hassle of setting up a full range of speaker systems.

Video upscaling to 1080p
Enjoy watching discs in the highest picture quality available for your HDTV. This Home Theater System offers full high-definition video playback up to 1080p resolution that provides a highly detailed picture and increased sharpness that delivers a more true-to-life picture for an amazing viewing experience.

Hi speed USB 2.0 Link and MP3 link
Simply plug your USB device into the USB jack to play your MP3/WMA/JPEG/DivX files; or plug your portable media player to the MP3 LINK jack to enjoy the music play in superb sound quality.

Sync the audio output with the video play
Synchronize audio and video by delaying the audio output if the video signal sent to the TV is slower than the audio streams.

Region codes
You can play discs with the following region codes.

<table>
<thead>
<tr>
<th>DVD region code</th>
<th>Countries</th>

</table>
### Product overview

#### Main unit

1. **(Standby-On)**
   - Turns on the Home Theater System or switches to standby mode.

2. **[Play/Pause]**
   - Starts, pauses or resumes disc play.
   - In radio mode, automatically tunes radio stations during first-time setup.

3. **VOL +/-**
   - Increases or decreases volume.

4. **[Stop]**
   - Stops disc play.
   - In radio mode, erases the current preset radio station.

5. **SOURCE**
   - Selects a media to play or listen to audio from the connected device.

6. **[Open/Close]**
   - Opens or closes the disc compartment.

7. **Disc compartment**

8. **iPod DOCK**
   - Docks a iPod.

9. **[USB]**
   - Connects a USB supported device.

10. **MP3 LINK**
    - Connects a portable audio player

11. **Display panel**

    Note

    - Control buttons on this Home Theater System are operated through touch screen display. The control displays will be dimly lit after one second of inactivity.
    - You can change the brightness of the touch screen display (see ‘Adjust settings’ > ‘General Setup’ > [Display Dim]).

#### Remote control

1. **[Power]**
2. **[Play/Pause]**
3. **[Stop]**
4. **[Volume up]**
5. **[Volume down]**
6. **[Source]**
7. **[Number buttons]**
8. **[Menu]**
9. **[Input]**
10. **[USB]**
11. **[Remote LOCK]**
12. **[Disc]**
13. **[IR sensor]**
14. **[OK]**
15. **[Reset]**
16. **[Settings]**
17. **[Volume]**
18. **[Channel]**
19. **[Menu]**
20. **[Volume]**
21. **[Channel]**
22. **[Remote LOCK]**
1  (Standby-On)
   • Turns on the Home Theater System or switches to standby mode.
   • When EasyLink is enabled, switches the Home Theater System and all EasyLink devices to standby. Note that you must press and hold (Standby-On) for at least 3 seconds for this to occur.

2  OPEN/CLOSE
   • Opens or closes the disc compartment.

3  Source buttons
   • DISC: Switches to the disc source.
   • USB: Switches to the USB source.
   • RADIO: Switches to FM band.
   • AUDIO SOURCE: Selects an audio input source.
   • iPod DOCK: Switches to the iPod in the dock.

4  SETUP
   • Accesses or exits the setup menu.

5  (Navigation buttons)
   • Navigates through the menus.
   • Press left and right for fast backward or forward search.
   • In radio mode, press up and down to tune the radio frequency.
   • In radio mode, press left or right to start auto search.

6  INFO
   • For discs, displays information about the current status or the disc.
   • For slideshows, displays a thumbnail view of photo files.

7  (Play/Pause)
   • Starts, pauses or resumes disc play.
   • In radio mode, automatically tunes radio stations during first-time setup.

8  (Stop)
   • Stops disc play.
   • In radio mode, erases the current preset radio station.

9  TREBLE / BASS
   • Selects Treble or Bass mode, then press +/- to set the level for treble or bass output.

10 Numeric buttons
    • Selects an item to play.

11 AUDIO SYNC
    • Selects an audio language or channel on a disc.
    • Press and hold to access the setting for audio sync, then press +/- to set the audio delay time.
    • In radio mode, toggles between FM stereo and FM mono.

12 SOUND MODE
    • Selects a predefined sound effect.

13 REPEAT / PROGRAM
    • Selects or turns off repeat or shuffle mode.
    • In radio mode, resets the list of preset stations: press to manually reset; press and hold to automatically reset.

14 OK
    • Confirms an entry or selection.

15 BACK
    • Returns to a previous screen.
    • For DVD, goes to the title menu.
    • For VCD version 2.0 or SVCD with PBC turned on, returns to the menu during playback.

16 (Previous/Next)
    • Skips to the previous or next title, chapter, or track.

17 (Mute)
    • Mutes or restores audio output.

18 +/-
    • Increases or decreases volume.

19 AMBISOUND
    • Selects stereo sound output or multi-channel surround output.
20 **SUBTITLE**
- Selects the subtitle language on a disc.

21 **HDMI / ANGLE**
- Selects the video resolution of HDMI output.
- Press and hold to display video from different camera angles.

22 **ZOOM**
- Zooms in or out of the picture.
3 Connect

Make the following connections to use your Home Theater System.

Basic connections:
- Video
- Speakers and subwoofer
- Power

Optional connections:
- Radio antenna
- Audio
  - Audio from TV
  - Audio from cable box/recorder/game console
- Other devices
  - Portable media player
  - USB device
  - iPod
- Attach table stand
- Mount the Home Theater System
- Mount the speakers

Note
- Refer to the type plate at the back or bottom of the product for identification and supply ratings.
- Before you make or change any connections, ensure that all the devices are disconnected from the power outlet.

Tip
- Different types of connectors may be used to connect this product to your TV, depending on availability and your needs. A comprehensive interactive guide to help you connect your product is available at www.connectivityguide.philips.com.

Place the Home Theater System

- Place the Home Theater System where it cannot be pushed, pulled over or knocked down. Do not place it in an enclosed cabinet.
- Be sure that you have full access to the power cord for easy disconnection of the Home Theater System from the power supply.

1 Place this Home Theater System near the TV.
2 Place the speakers system at normal listening ear-level and directly parallel to the listening area.
3 Place the subwoofer at the corner of the room or at least 3 feet away from the TV.

Tip
- To avoid magnetic interference or unwanted noise, never place this Home Theater System too close to any radiation devices.

Note
- Attach the table stand to this Home Theater System before place it on a table top. (see ‘Attach table stand’ on page 17)
- You can mount this Home Theater System (see ‘Mount the Home Theater System’ on page 18).
Connect video cables

Connect this Home Theater System to TV to view disc playback. Select the best video connection that the TV can support.

- Option 1: Connect to the HDMI jack (for a HDMI, DVI or HDCP-compliant TV).
- Option 2: Connect to the component video jacks (for a standard TV or Progressive Scan TV).
- Option 3: Connect to the video (CVBS) jack (for a standard TV).

Note

- You must connect this Home Theater System directly to a TV.

Before you connect

1. Push up the catch and remove the rear cover.

2. Connect the cables to the corresponding jacks and direct the cables to the open hole on top.
   - See the connection options in the following pages.

3. Once complete, close the rear cover.

Note

- All the cables must be placed inside the rear panel in order to close the rear cover properly.

Option 1: Connect to the HDMI jack

1. Connect an HDMI cable (not supplied) to the HDMI OUT jack on this Home Theater System and the HDMI input jack on the TV.

Note

- If your device supports HDMI CEC, you can control compliant devices with a single remote control. (see ‘Get started’ > ‘Use Philips EasyLink’).

Tip

- If the TV has a DVI connection only, connect via a HDMI/DVI adaptor. Connect an audio cable for sound output.
- You can optimize the video output. (see ‘Adjust settings’ > ‘Video setup’ > [HDMI Setup]).
- This type of connection provides the best picture quality.
Option 2: Connect to the component video jack

1 Connect the component video cable to the COMPONENT VIDEO OUT jack on this Home Theater System and the COMPONENT VIDEO input jack on the TV.
   • If a progressive scan TV is used, you may turn on the progressive scan mode.

Note

- The component video input jack on the TV might be labeled as Y Pb/Cb Pr/Cr or YUV.
- This type of connection provides good picture quality.

Option 3: Connect to the Video (CVBS) jack

1 Connect a composite video cable to the VIDEO OUT jack on this Home Theater System and the VIDEO input jack on the TV.

Note

- The video input jack on the TV might be labeled as A/V IN, VIDEO IN, COMPOSITE or BASEBAND.
- This type of connection provides standard picture quality.
Connect radio antenna

1. Connect the FM antenna to the FM7Ω jack on the subwoofer (for some models, this cable is already connected).

2. Extend the FM antenna and fix its ends to the wall.

*Tip*

- For better FM stereo reception, connect to an external FM antenna.

---

Connect speakers and subwoofer

1. Connect the left and right speakers to the matching jacks on the subwoofer.

2. Unwind the subwoofer’s interconnect cable at TO MAIN UNIT and connect it to the TO SUBWOOFER jack on this Home Theater System.

*Note*

- Ensure that the front portion of the plug is fully inserted into the jack.
Connect audio cables/other devices

Route the audio from other devices to this Home Theater System to enjoy audio play with multi-channel surround capabilities.

Connect audio from TV
(also used for EasyLink control)

1 Connect the audio cables (not supplied) to the AUDIO IN-AUX1 jacks on the Home Theater System and the AUDIO output jacks on the TV.

Note
- To listen to the audio output from this connection, press AUDIO SOURCE repeatedly until ‘AUX1 INPUT’ is displayed on the display panel.

Connect audio from cable box/ recorder/game console

You can choose to connect to analog or digital jack depending on the device capabilities.

Connect to analog jacks

1 Connect the audio cables (not supplied) to the AUDIO IN-AUX2 or AUX3 jacks on the subwoofer and the AUDIO output jacks on the device.

Note
- To listen to the audio output from this connection, press AUDIO SOURCE repeatedly until ‘AUX2 INPUT’ or ‘AUX3 INPUT’ is displayed on the display panel.
Connect to coaxial jack

1 Connect a coaxial cable (not supplied) to the **COAXIAL DIGITAL-IN** jack on the subwoofer and the **COAXIAL/DIGITAL** output jack on the device.

**Note**
- To listen to the audio output from this connection, press **AUDIO SOURCE** repeatedly until ‘**OPTICAL INPUT**’ is displayed on the display panel.

Connect to optical jack

1 Connect an optical cable (not supplied) to the **OPTICAL DIGITAL-IN** jack on the subwoofer and the **OPTICAL/SPDIF** output jack on the device.

**Note**
- To listen to the audio output from this connection, press **AUDIO SOURCE** repeatedly until ‘**MP3 LINK**’ is displayed on the display panel.

Connect portable media player

1 Connect a 3.5mm stereo audio cable (not supplied) to the **MP3 LINK** jack on this Home Theater System and the phone jack on the portable media player (such as MP3 player).
Connect USB device

1. Connect the USB device to the USB jack on this Home Theater System.

Note
- This Home Theater System can only play/view MP3, WMA, DivX (Ultra) or JPEG files that are stored on such devices.
- Press USB to access the content and play the files.

Connect iPod

1. Push the 'slide' button (A) to one side and move the 'holder' (C) until you get the best position to fit your iPod.
2. Release the 'slide' button (A).
3. Select a matching dock adaptor (D) and attach it to the 'holder' (C).
4. Dock your iPod to iPod DOCK slot on this Home Theater System.

Note
- To listen to the audio output from this connection, press iPod DOCK.
**Connect power cord**

---

**Warning**

- Risk of product damage! Ensure that the power supply voltage corresponds to the voltage printed on the back or underside of the subwoofer. Set the voltage selector (if any) correctly before you connect the subwoofer to the power outlet.

1. **Connect the power cord to the power outlet when all the required connections are done.**
   → The Home Theater System is ready to be set up for use.

---

**Attach table stand**

1. **Ensure all the required cables are connected to this Home Theater System and close the rear cover.**

2. **Attach the table stand bracket to the rear of this Home Theater System.**
   - Align the arrow indicators for correct positioning and placement.
   - Use the protrude panels to hold the table stand bracket.

\( A \) = table stand bracket.
Mount the Home Theater System

Caution

- Risk of personal injury and damage to the product. Allow only qualified persons to mount the product.

1. Ensure all the required cables are connected to this Home Theater System and close the rear cover.
2. Attach the big wall mount bracket to the table stand bracket with screws.
3. Position the brackets on the wall, drill four screw holes and secure the brackets onto the wall with screws (not supplied).
4. Hook the Home Theater System firmly onto the mounted bracket.
5. Screw the supplied knob to the hole at the center rear to secure the bracket.
Mount the speakers

Caution

- Risk of personal injury and damage to the product. Allow only qualified persons to mount the product.

1. Loosen the screws at the bottom of the speaker to remove the speaker stand.

2. Attach the small wall mount bracket to the speaker with screws.

3. Fix two screws (not supplied) to the wall, then hook the bracket onto the screws and lock the speaker into position.
4 Get started

Insert the remote control batteries

1 Slide the battery cover off the back of the remote control.
2 Insert the 2 supplied batteries (AAA). Be sure the + and - ends of the batteries line up with the markings inside the case.
3 Slide the cover back into position.

Note
- Do not mix batteries (old and new or carbon and alkaline, etc.).
- Remove batteries if they are exhausted or if the remote control is not to be used for a long time.
- Batteries contain chemical substances, they should be disposed of properly.

Control a play source
1 Press RADIO, USB or DISC button to select the source you wish to control.
2 Select the desired function (for example Play).

Navigate through the menu
1 Point the remote control directly at the remote sensor on the product and select the desired function.
2 Press the following buttons on the remote control to navigate through the on-screen menus.

<table>
<thead>
<tr>

</tbody>
</table>
Find the correct viewing channel

1 Press  on to turn on the Home Theater System.
2 Press DISC to switch to disc mode.
3 Turn on the TV and switch to the correct video-in channel in one of the following ways:
   • Go to the lowest channel on your TV, then press the Channel Down button until you see the Philips screen.
   • Press SOURCE button repeatedly on the remote control of your TV.

Tip
   • The video-in channel is between the lowest and highest channels and may be called FRONT, A/V IN, VIDEO, HDMI etc. See the TV user manual on how to select the correct input on the TV.

Select menu display language

Note
   • Skip this setting if this Home Theater System is connected to a HDMI CEC compliant TV. It switches automatically to the same OSD menu language as per your TV setting.

<table>
<thead>
<tr>
<th>General Setup</th>
</tr>
</thead>
<tbody>

</table>

1 Press DISC.
2 Press SETUP. ➔ [General Setup] menu is displayed.
3 Press .
4 Press ▲▼ to select [OSD Language] in the menu, then press .
   • The language options are different depending on your country or region. It may not correspond to the illustration shown here.
5 Press ▲▼ to select a language, then press OK.

Tip
   • You can set the default language for DVD disc menu (see ‘Adjust settings’ > ‘Preferences’ > [Disc Menu]).
Start Ambisound setup

Change the Ambisound setup according to your room environment and setup in order to obtain the best possible surround sound effect.

**Note**
- Before you start, ensure that you have made all the required connections.
- Complete the Ambisound setup before you insert a disc to play.

![Audio Setup]

1. Press DISC.
2. Press \(\bigcirc\) SETUP.
3. Press \(\downarrow\) to select [Audio Setup] in the menu, then press \(\uparrow\).
4. Select [Ambisound Setup] in the menu, then press \(\uparrow\).
   - If the setup option is not accessible, press \(\downarrow\) twice before you try the above steps again.
5. Press \(\uparrow\downarrow\) to select a setting in the menu, then press OK.
   - To exit the menu, press \(\bigcirc\) SETUP.

### Ambisound Setup

| Room Acoustics | Soft |
| Room Placement | Hard |
| Speaker Distance | Soft |
| Listening Position | |

To select the condition of the room
- Select [Room Acoustics] and press \(\uparrow\).

To select this Home Theater System placement in the room
- Select [Room Placement] and press \(\uparrow\).

To select the distance between two speakers
- Select [Speaker Distance] and press \(\uparrow\).

To select the distance between the listening position and the speakers
- Select [Listening Position] and press \(\uparrow\).
Turn on Progressive Scan

If the TV supports progressive scan output, you can connect this Home Theater System and the TV using component video connection. (see ‘Connect video cables’ > ‘Connect to the component video jack’).

<table>

</tbody>
</table>

1. Turn on the TV and ensure that the TV progressive scan mode is deactivated (see the TV user manual).
2. Switch the TV to the correct viewing channel for this Home Theater System.
3. Press DISC.
4. Press SETUP.
5. Press ▼ to select [Video Setup] in the menu, then press ►.
6. Select [Progressive] > [On], then press OK. ➔ A warning message is displayed.
7. To proceed, select [Ok] and press OK. ➔ The progressive setup is complete.
8. Press SETUP to exit the menu.
9. You can now turn on the progressive scan mode on the TV.

Note

- If a blank/distorted screen is displayed, wait for 15 seconds for the auto recover.
- If no picture displayed, turn off the progressive scan mode as follows: 1) Press ▲ to open the disc compartment. 2) Press ◀. 3) Press AUDIO SYNC.

Use Philips EasyLink

Your Home Theater System supports Philips EasyLink, which uses the HDMI CEC (Consumer Electronics Control) protocol. EasyLink-compliant devices that are connected through HDMI connectors can be controlled by a single remote control.

Note

- Philips does not guarantee 100% interoperability with all HDMI CEC devices.

1. Turn on the HDMI CEC operations on the TV and other connected devices. See TVs/devices manual for details.
2. You can now enjoy the following Philips EasyLink controls.

EasyLink

You can turn off or turn on all EasyLink features.

One-touch play
When you connect your Home Theater System to devices that support one-touch play, you can control your Home Theater System and the devices with one remote control. For example, when you press Play on your DVD remote control, your TV automatically switches to the correct channel to show the DVD content. To enable One-touch play, a video disc must be placed in the disc compartment before operation.
One-touch standby
When you connect your Home Theater System to devices that support standby, you can use your Home Theater System remote control to put your Home Theater System and all connected HDMI devices in standby mode. You can perform one-touch standby using the remote control from any of the connected HDMI devices.

System Audio Control
When you connect your Home Theater System to HDMI CEC compliant devices, your Home Theater System can switch automatically to play audio from the connected device.
To use one-touch audio, you must map the audio input from the connected device to your Home Theater System.

Audio Input Mapping
When you map the audio input correctly, this Home Theater System switches to the audio from the played device automatically.

Map the audio inputs to the connected devices

Note
- Before you start, ensure that the audio output of the HDMI TV and other HDMI devices have been connected to the audio input jacks on this Home Theater System.

Audio Input Mapping

| Aux1 Input | TV |
| Aux2 Input | DVD 3400 |
| Aux3 Input | other(non-HDMI) |
| Coaxial Input |
| Optical Input |

1. Press DISC.
2. Press [SETUP].

4. Select [EasyLink Setup], then press [One Touch Play] and [One Touch Standby] functions are turned on by default in the factory.

5. Select [System Audio Control] > [On], then press OK to start scanning devices.

6. Select the audio input of this Home Theater System that is used to connect to other HDMI device, then press [Aux1 Input].
   - For example, if the TV audio is connected to the AUX1 jack on this Home Theater System, select [Aux1 Input] and map with the TV (brand name) at the right panel.

7. Select the correct connected device, then press OK.
   - Repeat steps 5~7 to map other connected devices.

8. Press [SETUP] to exit the menu.
Select a play source

On the main unit

- Press SOURCE repeatedly to select:
  DISC > IPOD > RADIO FM >
  COAXIAL INPUT > OPTICAL INPUT
  > AUX1 INPUT > AUX2 INPUT >
  AUX3 INPUT > MP3 LINK > USB >
  DISC ...

On the remote control

- Press iPod DOCK to switch to dock mode.
- Press AUDIO SOURCE repeatedly to switch to the connected audio source:

- Press RADIO to switch to FM band.
- Press USB to switch to USB mode.
- Press DISC to switch to disc mode.
5 Play

Play a disc

Caution

- Never place any objects other than discs into the disc compartment.
- Never touch the disc optical lens inside the disc compartment.

1. Press ▲ to open the disc compartment.
2. Insert a disc with its label facing up.
   - For double-sided disc, load the side to play faces up.
3. Press ▼ to close the disc compartment and start disc play.
   - To view disc play, turn on the TV to the correct viewing channel for this Home Theater System.
   - To stop disc play, press ■.

Note

- Check the types of discs supported (see ‘Specifications’ > ‘Playback media’).
- If the password entry menu is displayed, enter the password before you can play the locked or restricted disc.
- If you pause or stop a disc for about 15 minutes, the screen saver activates. To deactivate the screen saver, press DISC.
- After you pause or stop a disc and no buttons are pressed within 30 minutes, this Home Theater System automatically switches to standby mode.

Play video

Note

- For video disc, playback always resumes from the point where it was last stopped. To start play from the beginning, press ▶ while the message is displayed.

Control video play

1. Play a title.
2. Use the remote control to control the title.

<table>
<thead>
<tr>

</tbody>
</table>

**Note**

- Some operations may not work with some discs. See the information accompanying the disc for details.

**Tip**

- You can change the PBC setting (see ‘Adjust settings’ > ‘Preferences’ > [PBC]).

---

Access DVD menu

1  Press DISC to access disc main menu.
2  Select a play option, then press OK.
   - In some menus, press the **Numeric buttons** to input your selection.
   - To return to the title menu during play, press ➔ BACK.

Access VCD menu

The PBC (Playback Control) for VCD is activated by default in the factory. When you load in a VCD, the contents menu is displayed.

1  Press ▲▼ to select a play option, then press OK to start play.
   - If PBC is off, it skips the menu and starts play from the first title.
   - To return to the title menu during play, press ➔ BACK (only possible if the PBC mode is on).

---
Sync audio output with video play
If the video play is slower than the audio output (sound does not match with the pictures), you can delay the audio output to match the video.

1 Press and hold AUDIO SYNC until 'AUDIO SYNC' is displayed.
2 Within five seconds, press +/- to set the delay time for audio output.

Note
• If the volume control is not used within five seconds, it resumes normal volume control function.

Quick skip play to a specific time

1 During play, press [INFO].
   ➔ The disc status menu is displayed.
2 Press ▲▼ to view information, then press OK.
   • [TT Time] (title time)
   • [Ch Time] (chapter time)
   • [Disc Time] (disc time)
   • [Track Time] (track time)
3 Press the Numeric buttons to enter the time where you want to skip to, then press OK.

Note
• The options are different depending on the disc type.

View video play from different camera angles

1 During play, press and hold ANGLE to display the angle options.
2 Press the Numeric buttons to select an angle.
   ➔ Play changes to the selected angle.

Note
• Applicable only to discs contain multi-angle scenes.
Play DivX® video

DivX video is a digital media format that retains high quality despite a high rate of compression. You can enjoy DivX video on this DivX® Certified Home Theater System.

1 Insert a disc or USB that contains the DivX videos.
2 Press DISC or USB. A contents menu is displayed.
3 Select a title to play, then press ► II.
4 Use the remote control to control the title.

<td>Searches fast-forward (right) or fast-backward (left). Press repeatedly to change the search speed.</td>
</tr>
</tbody>
</table>

REPEAT Selects or turns off repeat or shuffle mode.
**Play MP3/WMA music**

MP3/WMA is a type of highly compressed audio file (files with .mp3 or .wma extensions).

1. Insert a disc or USB that contains the MP3/WMA music.
2. Press **DISC** or **USB**.
   - A contents menu is displayed.
3. Select a folder, then press **OK**.
4. Select a track to play, then press **► II**.
   - To return to the main menu, press **◄ BACK** or press ▲ until 'Previous' folder is selected, then press **OK**.

**Note**

- For disc recorded in multiple sessions, only the first session is played.
- This Home Theater System does not support MP3PRO audio format.
- If any special characters are present in the MP3 track name (ID3) or album name, it might not be displayed correctly on the screen because these characters are not supported.
- Some WMA files are protected by Digital Rights Management and cannot be played on this Home Theater System.
- Folders/files that exceed the supported limit of this Home Theater System will not be displayed or played.

**Tip**

- You can select the display of data contents, view folders or files (see 'Adjust settings' > 'Preferences' > [MP3/JPEG Display]).

---

**Play photo**

**Play photo as slideshow**

This Home Theater System can play JPEG photos (files with .jpeg or .jpg extensions).

1. Insert a disc or USB that contains the JPEG photos.
2. Press **DISC** or **USB**.
   - Slideshow begins (for Kodak disc) or a contents menu (for JPEG disc) is displayed.
3. Select the folder/album you want to play.
   - To preview the photos in the folder/album, press **INFO**.
4. Press **► II** to start slideshow play.
   - To return to the menu, press **◄ BACK**.
Control photo play

1. Play photo slideshow.
2. Use the remote control to control the photo.

- Skips to the previous photo.
- Skips to the next photo.
- Rotates the photo clockwise.
- Rotates the photo anti-clockwise.
- Zooms in or out of the picture.
- Plays pause in zoom mode.
- Stops play.

Play musical slideshow

Play MP3/WMA music files and JPEG photo files simultaneously to create musical slideshow. The MP3/WMA and JPEG files must be stored on the same disc or USB device.

2. Navigate to the photo folder/album and press OK to start slideshow play.
   - Slideshow begins and continues till the end of the photo folder or album.
   - Audio continues to play till the end of the disc.
     - To stop slideshow play, press .
     - To stop music play, press again.

Play from USB device

This Home Theater System plays/views MP3, WMA, DivX (Ultra) or JPEG files on the following USB devices:
- digital camera that complies with the PTP standard
- flash drive
- memory card reader
- HDD (external power source needed)

1. Connect a USB device to the (USB) jack.
2. Press USB.
   - A contents menu is displayed.
3. Select a file to play, then press .
   - Play starts.
     - To stop play, press or remove the USB device.

Note
- You may require longer time to display the disc content on the TV due to the large number of songs/photos compiled onto one disc.
- If the JPEG photo is not recorded with an ‘exif’ type file, the actual thumbnail picture is not be shown on the display. It is replaced by a ‘blue mountain’ thumbnail picture.
- This Home Theater System can only display digital camera pictures according to the JPEG-EXIF format, typically used by almost all digital cameras. It cannot display Motion JPEG and pictures in formats other than JPEG, or sound clips associated with pictures.
- Folders/files that exceed the supported limit of this Home Theater System are not displayed or played.
Play from iPod

Simply dock your iPod to the iPod DOCK slot to enjoy your iPod play through this Home Theater System.

List of supported iPod range:

<table>
<thead>
<tr>
<th>iPod mini</th>
<th>iPod mini 2nd gen</th>
</tr>
</thead>
<tbody>
<tr>
<td>iPod touch</td>
<td>iPod touch 2nd gen</td>
</tr>
<tr>
<td>iPod classic</td>
<td>iPod nano 1st/2nd/3rd/4th gen</td>
</tr>
<tr>
<td>iPod with color display</td>
<td>iPod 5th gen</td>
</tr>
</tbody>
</table>

Note

Refer to the Philips website for latest updates on the supported iPod range.

Control iPod music

1. Dock your iPod to the iPod DOCK slot and turn it on.
2. Press iPod DOCK.
   - It may require longer time to authenticate the compatibility of certain iPod range.
3. Start play on your iPod.
4. Use the remote control to control the music play.

Note

• Control playback is only possible on the portable media player.
• Stop play on the portable media player before you switch to other play media/source.

Play from portable media player

Simply connect your portable media player (e.g. MP3 player) to this Home Theater System to enjoy superb sound quality from your music collections.

1. Connect a 3.5mm stereo audio cable (not supplied) from the MP3 LINK jack on this Home Theater System to the ‘headphone’ jack on the portable media player.
2. Press AUDIO SOURCE repeatedly until ‘MP3 LINK’ is displayed.
3. Start play on your portable media player.
   • To stop play, press STOP on the portable media player.

Note

• If the device does not fit into the USB jack, connect it through a USB extension cable.
• If you connect a multiple USB card/device reader, only one card/device can be accessed.
Play from radio

Check if the FM antenna has been connected to this Home Theater System. If not, connect the supplied FM antenna to the FM75 jack and fix its ends to the wall.

Tip

- For better FM stereo reception, connect an external FM antenna (not supplied).
- Position the antenna as far away as possible from your TV, VCR or other radiation source to prevent interference.

First time tuning

When you access to radio mode for the first time, follow the instructions to install the radio stations.

1. Press RADIO.
   - ’AUTO INSTALL ... PRESS PLAY’ is displayed.

2. Press ■.
   - All detected radio stations are stored.
   - Once complete, it tunes to the first preset radio station.
   - To stop auto tuning, press ■.

Note

- While in iPod mode, the battery of your iPod will be charged.
- In ‘Extended Control mode’, control of iPod play is only possible through the screen display on your TV using the Navigation buttons on the remote control.
Search and store radio stations individually

1. Press RADIO.
2. Press ◀️/▶️.
   - It starts searching until a radio station is detected.
3. Repeat step 2 until you tune to the radio station you wish to store.
   - To finetune the radio frequency, press ▲ / ▼.
4. Press PROGRAM.
   - The preset station number blinks.
   - If no action is carried out within 20 seconds after the above step, it exits the preset mode.
5. Press ◀️/▶️ (or the Numeric buttons) to select a preset number to store.
6. Press PROGRAM to confirm.

Listen to radio

1. Press RADIO.
2. Use the remote control to control the radio.

<table>
<thead>
<tr>
<th>Button</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>▶️/▶️</td>
<td>Selects a preset radio station.</td>
</tr>
<tr>
<td>▲/▼</td>
<td>Tunes the radio frequency up or down.</td>
</tr>
<tr>
<td>■</td>
<td>Press and hold this button to erase the current radio station from the preset list. The preset number for other radio stations remain unchanged.</td>
</tr>
</tbody>
</table>

Tip

- Press AUDIO SYNC to toggle between FM stereo and FM mono mode.

Reinstall all the radio stations

1. Press RADIO.
2. Press and hold PROGRAM for more than 5 seconds.
   - All previously stored radio stations are replaced.

Note

- This Home Theater System can store up to a maximum of 40 radio stations.
- If auto installation is not activated or less than 5 radio stations are stored, you will be prompted to install the radio stations again.

In some countries, the frequency step between adjacent channels in FM band is 50 kHz or 100 kHz.

Note

- This feature only applicable for certain region.
- Change tuning grid erases all preset radio stations.

1. Press RADIO.
2. Press ■.
3. Press and hold ▶️/◼ until ‘GRID 9’ or ‘GRID 10’ is displayed.
   - ‘GRID 9’ for 50 kHz and ‘GRID 10’ for 100 kHz.

Check the radio antenna connection if no stereo signal is detected or less than 5 stations are detected during radio installation.
6 Adjust sound

Control the volume

1 Press \( \Delta +/- \) (VOL +/-) to increase or decrease the volume.
   • To mute, press \( \times \).
   • To restore the volume, press \( \times \) again or press VOL +.

Adjust Bass/Treble

1 Press TREBLE or BASS.
2 Within 5 seconds, press \( \Delta +/- \) (VOL +/-) to set the high (TREBLE) or low (BASS) tone level.

Select Ambisound

1 Press AMBISOUND repeatedly to select the best Ambisound output that most suitable for the video or music you play.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>AUTO</td>
<td>Surround output based on the audio stream.</td>
</tr>
<tr>
<td>MULTI-CHANNEL</td>
<td>5.1 multi-channel output for a standard movie experience.</td>
</tr>
<tr>
<td>STEREO</td>
<td>Stereo sound from two front speakers.</td>
</tr>
</tbody>
</table>

Select a preset sound

1 Press SOUND MODE repeatedly to select the sound effect that most suitable for the video or music you play.

<table>
<thead>
<tr>
<th>Video/Music</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACTION / ROCK</td>
<td>Enhanced low and high range for great sounding movie effects and atmosphere. Great for action movies and rock/pop music.</td>

<td>Flat and pure sound mode. Ideal for listening to classical music and watching live concert disc.</td>
</tr>
<tr>
<td>DRAMA / JAZZ</td>
<td>Clear mid and high range. Recreates the atmosphere of a live club with the artist just in front of you. Good for jazz music and watching dramas.</td>
</tr>
<tr>
<td>NEWS</td>
<td>Enhanced mid range for clear vocals/speech.</td>
</tr>
<tr>
<td>GAMING / PARTY</td>
<td>Slightly enhanced low range and strong mid range ideal for party music and video gaming.</td>
</tr>
<tr>
<td>SPORTS</td>
<td>Moderate mid range and surround effects for clear vocals and the atmosphere of a live sports venue.</td>
</tr>
</tbody>
</table>
# Adjust settings

You can customize various kinds of settings as you prefer. Refer to the following instructions to navigate through the setup menus.

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Options</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Gear]</td>
<td>[General Setup]</td>
</tr>
<tr>
<td>![Speaker]</td>
<td>[Audio Setup]</td>
</tr>
<tr>
<td>![Camera]</td>
<td>[Video Setup]</td>
</tr>
<tr>
<td>![Checkmark]</td>
<td>[Preferences]</td>
</tr>
</tbody>
</table>

## Note
- If the setup option is grayed out, it means the setting cannot be changed at the current state.

### General setup

#### General Setup

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>

<td>OSD Language</td>
<td></td>
</tr>
<tr>
<td>Screen Saver</td>
<td></td>
</tr>
<tr>
<td>Sleep Timer</td>
<td></td>
</tr>
<tr>
<td>Low Power Standby</td>
<td></td>
</tr>
<tr>
<td>DivX(R) VOD Code</td>
<td></td>
</tr>
</tbody>
</table>

1. Press " SETUP. ➔ [General Setup] menu is displayed.
2. Press ▶.
3. Select an option, then press OK.
4. Select a setting, then press OK.
   - To return to the previous menu, press ➔ BACK.
   - To exit the menu, press SETUP.

### [EasyLink Setup]

If this Home Theater System is connected to HDMI CEC compliant TV/devices, all connected devices can respond to the following commands simultaneously:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>[EasyLink]</td>
<td>Turns off or on all EasyLink features. To disable this feature, select [Off].</td>
</tr>
<tr>
<td>[One Touch Play]</td>
<td>When you press PLAY, the TV and Home Theater System are turned on. Disc play starts if there is a disc in the Home Theater System. To disable this feature, select [Off].</td>
</tr>
<tr>
<td>[One Touch Standby]</td>
<td>When you press and hold STANDBY for at least 3 seconds, the Home Theater System and all the HDMI CEC devices switch to standby simultaneously. To disable this feature, select [Off].</td>
</tr>
<tr>
<td>[System Audio Control]</td>
<td>When you play audio that is routed from the connected devices, this Home Theater System switches to the corresponding audio source automatically. To enable this feature, select [On]. Then proceed to [Audio Input Mapping] to scan and map all the connected devices.</td>
</tr>
</tbody>
</table>
**Screen Saver**

Turns off or on the screen saver mode. Helps to protect the TV screen from being damaged due to over exposure to a static image for too long.

- **[On]** – Sets the screen saver to appear after 15 minutes of inactivity (for example, in pause or stop mode).
- **[Off]** – Disables screen saver mode.

**Sleep Timer**

Switches to standby automatically after the preset time.

- **[15 mins]**, **[30 mins]**, **[45 mins]**, **[60 mins]** – Selects the count down time before the Home Theater System switches to standby.
- **[Off]** – Disables sleep timer mode.

**Low Power Standby**

Turns off or on the low power standby mode. Reduces power consumption in standby mode.

- **[On]** – Sets the standby mode to low power.
- **[Off]** – Sets the standby mode to normal power.

**Disc Lock**

Sets play restriction for a specific discs. Before you start, place the disc in the disc compartment (maximum 40 discs can be locked).

- **[Lock]** – Restricts access to the current disc. Once activated, a password is needed to unlock and play the disc.
- **[Unlock]** – Plays all discs.

**Display Dim**

Changes the brightness level of the display panel on this Home Theater System.

- **[100%]** – Normal brightness.
- **[70%]** – Medium brightness.
- **[40%]** – Dimmest display.

**OSD Language**

Selects the default on-screen menu language.

---

**Note**

- You must turn on the HDMI CEC operations on the TV/devices before you can enjoy the EasyLink controls. See the TV/devices manual for details.
- Philips does not guarantee 100% interoperability with all HDMI CEC compliant devices.

**Tip**

- You can set or change the password (see 'Adjust settings' > 'Preferences' > [Password]).
Audio setup

Audio Setup

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>

1. Press 🅱️ SETUP.  
   ➔ [General Setup] menu is displayed.
2. Press ▼ to select [Audio Setup], then press ▶.
3. Select an option, then press OK.
4. Select a setting, then press OK.
   - To return to the previous menu, press 🅱️ BACK.
   - To exit the menu, press 🅱️ SETUP.

Note

- See the explanations of the above options in the following pages.

[HDMI Audio]
Selects the HDMI audio setting when you connect this Home Theater System and the TV with a HDMI cable.
- [On] – Allows audio output through the TV and the speaker system. If the audio format on the disc is not supported, it will be downmixed to two-channel sound (linear-PCM).
- [Off] – Disables audio output from the TV. The sound is only output through the speaker system.

[Night Mode]
Makes loud sound level softer and soft sound level louder so that you can watch the DVD movies at a low volume, without disturbing others.
- [Off] – Enjoys surround sound with a full dynamic range.

Note

- Applicable only to Dolby Digital encoded discs.

[Ambisound Setup]
Optimizes the Ambisound based on this Home Theater System setup in the room (see ‘Getting Started’ > ‘Start Ambisound setup’).

<table>

</table>

1. Press SETUP. [General Setup] menu is displayed.
2. Press ▼ to select [Video Setup], then press ►.
3. Select an option, then press OK.
4. Select a setting, then press OK.
   - To return to the previous menu, press ► BACK.
   - To exit the menu, press SETUP.

Note
- See the explanations of the above options in the following pages.

[TV System]
Change this setting if the video does not appear correctly. By default, this setting matches the most common setting for TVs in your country.
- [PAL] – For PAL-system TV.
- [NTSC] – For NTSC-system TV.
- [Multi] – For TV that is compatible with both PAL and NTSC.

[TV Display]
Selects one of the following display formats:

- [4:3 Pan Scan] – For 4:3 screen TV: full-height display with the trimmed sides.
- [4:3 Letter Box] – For 4:3 screen TV: wide-screen display with black bars on the top and bottom of the screen.

[Picture Setting]
Selects a predefined set of picture color settings or customize the personal setting.
- [Standard] – Original color setting.
- [Bright] – Vibrant color setting.
- [Soft] – Warm color setting.
- [Personal] – Customizes the color setting. Set the level of brightness, contrast, sharpness/tint and color saturation, then press OK.

[HDMI Setup]
Selects the HDMI video setting when you connect this Home Theater System and the TV with a HDMI cable.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>[Superwide]</td>
<td>Center position of the screen is stretched less than the side. Applicable only to 720p and above video resolution setting.</td>
</tr>
<tr>
<td>[4:3 Pillar Box]</td>
<td>No stretching of picture. Black bars are displayed on both sides of the screen.</td>
</tr>
<tr>
<td>[Off]</td>
<td>Picture is displayed according to the disc format.</td>
</tr>
</tbody>
</table>
There is more detailed description available (see ‘Get started’ > ‘Turn on Progressive Scan’).

Preferences

Note

• Stop disc play before you can access to [Preferences].

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>

<tr>
<td>DivX Subtitle</td>
<td></td>
</tr>
</tbody>
</table>

1 Press SETUP. ➔ [General Setup] menu is displayed.
2 Press ▼ to select [Preferences], then press ▶.
3 Select an option, then press OK.
4 Select a setting, then press OK.
   • To return to the previous menu, press ➔ BACK.
   • To exit the menu, press SETUP.

Note

• See the explanations of the above options in the following pages.

Tip

• This setting is only available if you have set the [TV Display] setting to [16:9 Wide Screen].

Note

• If the setting is not compatible with your TV, a blank screen appears. Wait for 15 seconds for auto recover or press HDMI repeatedly until the picture appears.

[Closed Caption]
Turns off or on display captions.
• [On] – Shows the sound effects in subtitles. Applicable only to discs with Closed Caption information included and the TV supports this feature.

[Progressive]
If the TV supports progressive scan output, you can turn on the progressive scan mode to enhance the picture quality. Video connection through Component Video is required.
• [On] – Turns on progressive scan mode.
• [Off] – Disables progressive scan mode.
[Audio]
Selects the default audio language for disc play.

[Subtitle]
Selects the default subtitle language for disc play.

[Disc Menu]
Selects the language for disc menu.

---

[Note]
- If the language you have set is not available on
  the disc, the disc uses its own default language.
- For some discs, the subtitle/audio language can
  only be changed from the disc menu.
- To select the languages that are not listed
  in the menu, select [Others]. Then check
  the Language Code list at the back of this
  user manual and enter the respective 4-digit
  language code.

[Parental]
Restricts access to discs that are unsuitable
for children. These types of discs must be
recorded with ratings.

1) Press OK.
2) Select a rating level, then press OK.
3) Press the Numeric buttons to enter the
password.

---

[Note]
- Rated discs above the level you set in
  [Parental] require a password to be played.
- The ratings are country-dependent. To allow
  all discs to play, select ‘8’.
- Some discs have ratings printed on them but
  are not recorded with ratings. This function
  has no effect on such discs.

[Tip]
- You can set or change the password (see
  ‘Preferences’ > [Password]).

[Password]
Sets or changes the password for locked discs
and play restricted DVDs.

---

[Change Password]

<table>
<thead>
<tr>

<td></td>
</tr>
</tbody>
</table>

1) Press the Numerical buttons to enter
   ‘136900’ or the last set password at [Old
   Password] field.
2) Enter the new password at [New
   Password] field.
3) Enter the new password again at [Confirm
   Password] field.
4) Press OK to exit the menu.

---

[Note]
- If you forget the password, enter ‘136900’
  before you set a new password.

---

[PBC]
Turns off or on the content menu of VCDs/
SVCDs with PBC (playback control) feature.
- [On] - Displays index menu when you
  load a disc for play.
- [Off] - Skips the menu and start play
  from the first title.

[MP3/JPEG Display]
Selects to display the folders or display all the
files.
- [View Folders] – Displays the folders of
  MP3/WMA files.
- [View Files] – Displays all the files.

---

[Audio]
Selects the default audio language for disc play.

[Subtitle]
Selects the default subtitle language for disc play.

[Disc Menu]
Selects the language for disc menu.
[DivX Subtitle]
Selects a character set that supports the DivX subtitle.

**Note**

- Ensure that the subtitle file has the exact same file name as the movie file. If for example the file name of the movie is ‘Movie.avi’, then you will need to name the text file ‘Movie.sub’ or ‘Movie.srt’.

[Version Info.]
Displays the software version of this Home Theater System.

**Tip**

- This information is required when you want to find out if a newest software version is available at the Philips website that you may download and install on this Home Theater System.

[Default]
Resets all the settings of this Home Theater System to factory default, except for [Disc Lock], [Password] and [Parental] settings.
8 Additional Information

Update software

To check for new updates, compare the current software version of your Home Theater System with the latest software version (if available) at the Philips website.

1 Press SETUP.
2 Select [Preferences] > [Version Info.], then press OK.
3 Write down the version number, then press SETUP to exit the menu.
4 Go to www.philips.com/support to check the latest software version available for this Home Theater System.
5 If the latest software version is higher than the software version of this Home Theater System, download it and store onto a CD-R or USB flash drive.
6 Insert the CD-R or USB flash drive to this Home Theater System.
7 Press DISC or USB, then follow the instruction on the TV to confirm update operation.
   ➔ Once software update is complete, this Home Theater System turns off to standby automatically.

Note

• Do not remove the CD-R or USB when software updating is in progress.

8 Disconnect the power cord for a few seconds and connect again to reboot the system.

Care

Caution

• Never use solvents such as benzene, thinner, cleaners available commercially, or anti-static sprays intended for discs.

Clean discs
Wipe the disc with a micro fibre cleaning cloth from the centre to the edge in a straight line movement.

Clean main unit screen
Wipe the screen surface with a micro fibre cleaning cloth.
9 Specifications

Note
- Specification and design are subject to change without notice

Playback media

Amplifier
- Total output power: 600 W RMS
- Frequency response: 30 Hz ~ 20 kHz / ±3dB
- Signal-to-noise ratio: > 65 dB (CCIR)
- Input sensitivity:
  - AUX1/2/3 : 250 mV
  - MP3 LINK: 100 mV

Disc
- Laser Type: Semiconductor
- Disc diameter: 12cm / 8cm
- Video decoding: MPEG1/ MPEG2 / DivX / DivX Ultra
- Video DAC: 12 bits, 108 MHz
- Signal system: PAL / NTSC
- Video S/N: 56 dB
- Audio DAC: 24 bits / 96 kHz
- Frequency response:
  - 4 Hz - 20 kHz (44.1 kHz)
  - 4 Hz - 22 kHz (48 kHz)
  - 4 Hz - 44 kHz (96 kHz)
- PCM: IEC 60958
- Dolby Digital: IEC 60958, IEC 61937
- DTS: IEC 60958, IEC 61937

Radio
- Tuning range: FM 87.5-108 MHz (50/100 kHz)
- 26 dB quieting sensitivity: FM 22 dBf
- IF rejection ratio: FM 60 dB
- Signal-to-noise ratio: FM 60 dB
- Harmonic distortion: FM 3%
- Frequency response: FM 180 Hz~10 kHz / ±6dB
- Stereo separation: FM 26 dB (1 kHz)
- Stereo Threshold: FM 29 dB

USB
- Compatibility: Hi-Speed USB (2.0)
- Class support: UMS (USB Mass Storage Class)
- File system: FAT12, FAT16, FAT32

Main Unit
- Dimensions (WxHxD): 419 x 48 x 214 (mm)
- Weight: 1.7 kg

Ambisound speakers
- System: full range satellite
- Speaker impedance: 8 ohm/channel
- Speaker drivers: 2.5” full range/channel
- Frequency response: 120 Hz - 20 kHz
  - Dimensions (WxHxD): 335.5 x 113 x 128.5 (mm)
  - Weight: 1.72kg/each
Power (Subwoofer)
- Power supply: 110-127V/220-240V;~50-60Hz switchable
- Power consumption: 150 W
- Standby power consumption:
  - Normal: <3 W
  - Low Power: < 0.3 W
- System: Bass Reflex System
- Impedance: 4 ohm
  - Speaker drivers: 165 mm (6.5’’), woofer
- Frequency response: 30 Hz ~ 120 Hz
  - Dimensions (WxHxD): 295 x 440 x 295 (mm)
  - Weight: 10 kg

Laser specification
- Type: Semiconductor laser GaAlAs (CD)
- Wave length: 645 - 660 nm (DVD), 770 - 800 nm (CD)
- Output power: 6 mW (DVD), 7 mW (VCD/CD)
- Beam divergence: 60 degrees.
10 Troubleshooting

Warning

- Risk of electric shock. Never remove the casing of the product.

To keep the warranty valid, never try to repair the product yourself.
If you encounter problems when using the product, check the following points before requesting service. If the problem remains unsolved, register your product and get support at www.philips.com/welcome.

If you contact Philips, you will be asked for the model and serial number of your Home Theater System. The model number and serial number are on the back or bottom of your Home Theater System. Write the numbers here:
Model No. __________________________
Serial No. ___________________________

Main unit

The buttons on this Home Theater System do not work.
- Disconnect this Home Theater System from the power outlet for a few minutes, then connect again.

Picture

No picture.
- See TVs manual for correct video input channel selection. Change the TV channel until you see the DVD screen.
- Press DISC.
- If you have changed the [TV Display] setting, switch back to default mode: 1) Press ▲ to open the disc compartment. 2) Press ▼. 3) Press SUBTITLE.

No picture on HDMI connection.
- Check if the HDMI cable is faulty. Replace a new HDMI cable.
- If this happens when you change the HDMI video resolution, press HDMI repeatedly until the picture appears.

Sound

No sound.
- Ensure that the audio cables are connected and press the correct input source (for example, AUDIO SOURCE, USB) to select the device you want to play.

No sound on HDMI connection.
- Sound cannot transmit through HDMI connection if the connected device is non-HDCP compliant or only DVI-compatible. Make an analog or digital audio connection.
- Ensure that the [HDMI Audio] setting is turned on.

No sound from TV program.
- Connect an audio cable from the AUDIO input on this Home Theater System to the AUDIO output on your TV. Then press AUDIO SOURCE repeatedly to select the corresponding audio input source.
Play

**DivX video files cannot be played.**
- Ensure that the DivX file is encoded according to the ‘Home Theater Profile’ with the DivX encoder.
- Ensure that the DivX video file is complete.

The aspect ratio of the screen is not aligned with the TV display setting.
- The aspect ratio is fixed on the disc.

**DivX subtitle does not display correctly.**
- Ensure that the subtitle file name is the same as the movie file name.
- Select the correct character set: 1) Press SETUP. 2) Select [Preferences], then press ▶. 3) Select [DivX Subtitle], then press OK. 4) Select the character set that supports the subtitle.

The contents of the USB flash drive cannot be read.
- The USB flash drive format is not compatible with this Home Theater System.
- Drive is formatted with different file system which is not supported by this unit (e.g. NTFS).
- Maximum size of memory supported is 160GB.

The video (movies, photos, video clips, etc.) contents of the iPod does not display in Extended Control mode.
- Video browsing is not supported in Extended Control mode, you can only browse the video contents on the iPod itself.
11 Glossary

A

Aspect ratio
Aspect ratio refers to the length to height ratio of TV screens. The ratio of a standard TV is 4:3, while the ratio of a high-definition or wide TV is 16:9. The letter box allows you to enjoy a picture with a wider perspective on a standard 4:3 screen.

D

DivX Video
DivX® is a digital video format created by DivX, Inc. This is an official DivX Certified device that plays DivX video. Visit www.divx.com for more information and software tools to convert your files into DivX video.

DivX Video-On-Demand
This DivX Certified ® device must be registered in order to play DivX Video-on-Demand (VOD) content. To generate the registration code, locate the DivX VOD section in your device setup menu. Go to vod.divx.com with this code to complete the registration process and learn more about DivX video.

Dolby Digital
A surround sound system developed by Dolby Laboratories that contains up to six channels of digital audio (front left and right, surround left and right, center and subwoofer.)

DTS
Digital Theatre Systems. A surround sound system for providing 5.1 channels of discrete digital audio in consumer electronics products and software content. It is not developed by Dolby Digital.

H

HDCP
High-bandwidth Digital Content Protection. This is a specification that provides a secure transmission of digital contents between different devices (to prevent unauthorized copyright.)

HDMI
High-Definition Multimedia Interface (HDMI) is a high-speed digital interface that can transmit uncompressed high definition video and digital multichannel audio. It delivers high quality picture and sound quality, completely free from noise. HDMI is fully backward-compatible with DVI.
As required by the HDMI standard, connecting to HDMI or DVI products without HDCP (High-bandwidth Digital Content Protection) will result in no Video or Audio output.

J

JPEG
A very common digital still picture format. A still-picture data compression system proposed by the Joint Photographic Expert Group, which features small decrease in image quality in spite of its high compression ratio. Files are recognized by their file extension ‘.jpg’ or ‘.jpeg.’

M

MP3
A file format with a sound data compression system. MP3 is the abbreviation of Motion Picture Experts Group 1 (or MPEG-1) Audio Layer 3. With the MP3 format, one CD-R or CD-RW can contain about 10 times more data than a regular CD.

MPEG
Motion Picture Experts Group. A collection of compression systems for digital audio and video.
P

PBC
Playback Control. A system where you navigate through a Video CD/Super VCD with on-screen menus that are recorded onto the disc. You can enjoy interactive playback and search.

PCM
Pulse Code Modulation. A digital audio encoding system.

Progressive scan
The progressive scan displays twice the number of frames per second than in an ordinary TV system. It offers higher picture resolution and quality.

W

WMA
Windows Media™ Audio. Refers to an audio compression technology developed by Microsoft Corporation. WMA data can be encoded with Windows Media player version 9 or Windows Media player for Windows XP. Files are recognized by their file extension ‘.wma.’
