Healthy air, always

with NanoCloud technology and automatic control

Automatic control and smart evaporation technology. The Philips air humidifier fights dry air with precision. It evenly distributes humidified air throughout the room and spreads 99% fewer bacteria compared with ultra-sonic humidifiers.

Healthy Air

- Hygienically safer, no white dust* and no wet desktop
- Evenly distributes humidified air throughout the room
- Humidification settings allow for precise humidity control
- Automatic humidity mode for your peace of mind

Always

- Healthy air protect alert tells you when to refill the tank
- Auto shutdown when humidifier runs out of water

Simplicity

- 1/4/8 hours easy-to-set timer
- Sleep mode when the humidifier runs with minimal lighting
- Choose between silent, standard and auto humidification
- Minimalist design gives you best-in-class cleanability
- Easy-fill tank

Highlights

NanoCloud technology

This Philips air humidifier offers a three-stage advanced evaporation system with NanoCloud technology. Stage 1: the absorbent filter on the humidifier catches big particles such as human/pet hair and dust when drawing in the dry air. Stage 2: the advanced evaporation system with NanoCloud technology humidifies the air by adding water molecules to the air and does not carry bacteria or scale. Stage 3: healthy air gets blown out of the humidifier at a constant speed, delivering comfortable, healthy, humid air without the formation of water mist in your home.

Comfortable humidification

Evenly distributes humidified air throughout the room. Breathe and sleep better at home with healthy humidified air

Precise humidity settings

The Philips Air humidifier allows you to choose between 40, 50 and 60 percent humidity in the air for maximum comfort.

Automatic humidity mode

The automatic mode uses the digital sensor to constantly monitor the air humidity and will turn your humidifier on and off whenever needed, ensuring the humidity is constantly at the right level

Healthy air protect alert

Red light alert tells you when to refill the tank

Healthy air protect lock

When the water tank is empty and needs to be refilled, the healthy air protect lock shuts off the humidifier and a red indicator lights up telling you that the humidifier has stopped.

1/4/8 hours easy-to-set timer

Appliance operates for a set number of hours and automatically switches off when set time has elapsed.

Dedicated sleep mode

Dedicated sleep mode when the humidifier runs at the minimum noise level and all lights are off except the speed indicator

Philips Green Logo

Philips Green Products can reduce costs, energy consumption and CO2 emissions. How? They offer a significant environmental improvement in one or more of the Philips Green Focal Areas — Energy efficiency, Packaging, Hazardous substances, Weight, Recycling and disposal and Lifetime reliability.

Specifications

Design specifications

Product dimensions (W x D x H):

249*249*339 mm

Colour(s): white and oyster metallic

Technical specifications

Recommended room size: 25 m²

Humidification capacity: 220 ml/h

Water tank capacity: 2 l

Operation time: 8 hour(s)

Air quality sensor(s): Humidity sensor

Noise level: as low as 26 dB in silent mode dB

Voltage: 220-240 V

Replacement

Humidification filter: Replace FY2401 once every 6 months
