AirFloss

w/ 1 nozzle

HX8221/02

Don't floss? Then AirFloss.

Removes plaque where brushing can't

For those who don't floss consistently, AirFloss is an easy way to start cleaning between teeth. AirFloss can be used with mouthwash or water and features unique air and micro-droplet technology to help remove plaque in hard to reach areas.

Achieve a 30-second clean

- Cleans your entire mouth in just 30 seconds
- Point. Press. Clean!

Improves oral health

- Helps improve gum health in just two weeks than manual brushing alone
- Helps prevent cavities between teeth
- Removes up to 5x more plaque in-between teeth than manual brushing alone

Easy to use

- Technology that cleans with a touch
- Guidance tip ensures correct placement
- Comfortable ergonomic handle

Helps build a healthy habit

- An easy way to improve cleaning between teeth

Highlights

Air and micro-droplet technology

AirFloss utilizes unique air and micro-droplet technology to send a burst of pressurized air and water or mouthwash between your teeth. The one-touch activation button is as simple as a mouse click.

Easy-fill reservoir

Fill the reservoir on the handle with either mouthwash or water for a refreshing clean, then point and shoot. The reservoir holds enough liquid for up to two uses.

Helps prevent cavities

By gently bursting away plaque that brushing missed, Sonicare AirFloss helps prevent cavities from forming in the spaces between your teeth.

30 Second Clean

With the AirFloss, cleaning your entire mouth takes just 30 seconds. Simply press the button once for a single burst, then move and repeat. To use the new auto-burst feature, hold down the button and move the guidance tip from space to space. It will automatically burst every second.

Guidance tip

The slim angled nozzle and guidance tip make finding the correct placement easy. Just slide along the tooth's surface near the gum line until the tip fits into the groove between the teeth.

Removes more plaque

Cleaning between your teeth is an important part of your oral health. Sonicare AirFloss uses air and micro-droplet technology to remove up to 5x more plaque between teeth than manual brushing alone.

Better gum health

Sonicare AirFloss is clinically proven to improve gum health in just two weeks than manual brushing alone.

Ergonomic handle

Designed to be easy to maneuver in tight spaces, AirFloss has a comfortable ergonomic handle and a non-slip grip.
