# Highlights

## Dolby Digital, dts, VSS

Dolby Digital, dts, Virtual Surround Sound

## 2x25W RMS/1000W PMPO

2x25W RMS/1000W PMPO

## DSC for music and movies

(Optimal, Classic, Jazz, Rock or Drama, Action, Sci-Fi Concert) Digital Sound Control (or DSC) offers different sound settings tailored for specific musical styles and movie environment.

## Treble and Bass Control

Treble and bass are equalizer features that control the high and low frequency sound levels of your audio respectively. Treble specifically regulates the amplification of the high tones in the music while bass controls the amplification level of the low tones. Using the up and down keys, the listener can conveniently place more or less emphasis on the low and high tones, or leave treble and bass flat to playback music according to its original recorded setting. Treble and Bass Control lets you listen to your music the way you like it.

## Sleep Timer

Sleep timer lets you decide how long you want to listen to music or a radio station of your choice before falling asleep. Simply set a time limit (up to 1 hour) and choose a CD or radio station to listen to while you drift off to sleep. The set will continue to play for the selected duration and then automatically switch off to a power-efficient, silent stand-by mode. Sleep Timer lets you fall asleep to your favorite CD or radio DJ without counting sheep or worrying about wasting power.

## 40-preset digital tuning

Digital radio offers you additional music options to your music collection on your Philips audio system. Simply tune into the station that you want to preset, press and hold the preset button to memorize the frequency. With preset radio stations that can be stored, you can quickly access your favorite radio station without having to manually tune the frequencies each time.

## Karaoke

The Karaoke feature on your DVD player provides endless entertainment and maximum audio and singing enjoyment. You can enhance your performance by adding an 'echo' effect to your voice. The key controls allows you to choose the optimal key for your personal vocal range.

## Video connections (AP)

Video: Component out (PrPbY), S-Video out, Video out

## Sound connections w/ DIN out

Sound: 3.1 DIN out, Subwoofer out, Digital out, Line out
