Let's make things better.

PHILIPS

Multiple Online Music Services

Internet Radio Stations

Choose from hundreds of Internet radio stations spanning every genre, language and region so you can choose exactly what you want to listen to and when. This breadth of content is far beyond a conventional FM radio – whether you are looking for music, news, sport or special interests. And enjoy near-CD sound quality of all the broadcasts from your favorite radio stations.

Online Music Charts

Whatever your taste in music, you'll discover a dedicated online chart, updated every day and ready to immerse you in a refreshing stream of the very best sounds from your preferred musical genre. Unlike conventional radio, you retain control over what you hear. You can often skip to the next track and also see what the artist of the next track is.

Personalized Internet Radio

Through your internet connection, you can view a vast catalogue of artists, music styles and musical eras. By picking out your favorites, you can create a personalized station that will playback music off those and similar taste artists. Every time you tune in, the station will play the songs you love by the artists you prefer... and add a dash of extra interest by matching up your tastes and selections with similar new styles and sounds to intrigue and entice you.

Virtual Jukebox

If you've got a collection of CDs that you treasure, we're sure you'll appreciate a player that lets you listen to them whenever you want, in whatever order you choose... without having to constantly get up and change CDs. When you use the virtual jukebox of our Internet partner you can put your CDs on line in a matter of seconds and they'll be stored safely in your personal online 'locker'. From that collection of your music, you can create limitless customized music playlists to suit every mood and occasion.

INFO! Service

Has a song on the radio every piqued your interest, but you missed or forgot the artist's name? Frustrated? With the MC-i200's INFO! service you can simply press the INFO! button on the set and you'll receive an email containing information about the artist and the track. You can also link to retailers to buy the music. And if you're already drowning in emails, don't worry... Set your email preferences using myPhilips.com and the site will store your INFO! choices till you choose to review them online at your leisure.

Product Features

PC Link

If you've already got a raft of digital music files stored on your PC, there's no need to waste or repeat all that work! Your MC-i200 becomes part of your home network, connected to both the internet and your PC via the gateway router. By pressing the PC-Link button on the set, you have instant access to the music files stored on your hard drive. And, even better, you get to play them through the MC-i200's crisp, clear, powerful, patented wOOx speakers!

Upgradeable

Keep your MC-i200 up to date. Simply use your Internet connection to download and install software updates for exciting new services and product features.

My.Philips.com

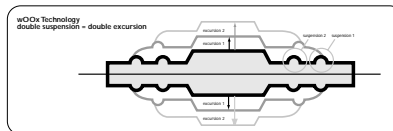

Created exclusively for owners of Philips broadband internet products, the myPhilips.com site is your personal online tool for getting information and managing your entertainment choices. By subscribing to the exclusive "myPhilips.com" site, Streamium product owners will be able to interact with your chosen online content. Whether you want to access your online music collections or contact your music service providers, see if the latest set software is available, manage your favorites, add Internet radio stations via the Stream saver function, find out more about the track and artist requested by the INFO! button. myPhilips.com is the place to do it. Quick, easy, convenient and personal.

2 x 50 Watts RMS Stereo

50 watts continuous RMS power output per channel, at 6 Ohms, from 80Hz-16kHz, with no more than 10% Total Harmonic Distortion (THD).

wOOx Technology

Philips patented wOOx Technology ensures superior bass results. The dual suspension bass radiator, together with dedicated amplifier circuitry, is especially designed to produce and handle high dynamic sound signals at very low frequencies. Because of the dual suspension, the excursion of the membrane can be extreme (see illustration). This is in combination with the symmetrical sandwich construction, provides for very low and precise bass without noticeable distortion. The net effect of using wOOx Technology is a tight bass sound that is significantly "lower and louder" than conventional mini shelf systems.

Bass & Treble Control

Bass & Treble control allows sound adjustment of high and low frequencies to personal preferences.

Incredible Surround™

An exciting new, psycho-acoustic method of widening the stereo spatial image especially suited for applications with limited separation of left and right speakers.

2-way Bass Reflex Speaker System

Equipped with one 5.25" aluminium cone woofer and one 2" cone tweeter for crisp high tones.

Flat Metal Cone Woofers

The lightweight and strong metal cone woofer enables greater sound clarity.

AM/FM Stereo Digital Tuner

State-of-the-art precision tuning system insures precise, accurate station selection every time, along with the greatest performance and reliability available.

Subwoofer Ready

Affords easy access to greater dimension in sound with output signals available for connection to a subwoofer.

Detachable Cloth Speaker Grilles

Detachable cloth covered grilles protect delicate speaker components in a rich high-tech styling.

MP3 Playback

Download MP3 songs from the Internet on a PC and record them on a CD. This special "MP3-CD" can now be played on this Audio CD Recorder. One MP3-CD can carry up to 12 hours of music. Our sets are designed to playback MP3-CDs recorded with a bit-rate (quality level) between 32 kbps and 320 kbps. The set will also handle variable bit-rate recordings.

Plays CD, CD-R and CD-RW discs

The player offers 100% playback guarantee of CD, CD-R and CD-RW discs over the entire lifetime of the player. Even CD-RW audio recordings on computers can be used.

Favorites

A fun, fast and easy way to bookmark and access all your Favorite music. From the tracks of a CD/mp3PRO-CD, the regular radio stations to the channels/stations offered by our music services, all can be bookmarked as a Favorite at the touch of the (UN)MARK button. By pressing Favourites in any music source the list will be shown on the display, and you are ready to select and play a new Favorite.

AUX/Video Input

For connection of audio accessory pieces such as a LD or DVD player, television, or external cassette deck.

Shuffle

Plays a CD in random order. On a mp3PRO-CD shuffle can be used for the whole CD, by album, by artist, by genre or by playlist.

Clock, Alarm and Sleep timer

Set the alarm portion of a built-in digital clock to wake you to music from your favorite CD or an AM/FM radio station at any desired time of the day. Sleep timer settings of 60, 45, 30 or 15 minutes.

3 Dim Display modes (including nite mode)

2 different display options showing different amounts of display activity can be selected and 1 nite mode display which shows minimal display activity and turns most of the lights off.
