

Introduction

Software version: **5.0.15**

Benefits of the software:

This software version is for MacOS X. With this software your (non-DRM) music on your Mac computer can be streamed to the Network Music player.

Software Version Verification Procedure

A key is needed during the software installation. That key can be found on the CDROM cover that comes with the NP2500/2900 package.

1. Download the software to your Mac computer which is in zip format.
 2. Double click the zip file to unzip the pkg file.
 3. Double click the pkg file to start the installation.
 4. Follow the instructions on the pop-up windows to perform the installation.
 - Fill in the key when it is needed.
 5. Run the TwonkyMedia Server software by clicking *Go* → *Application* → *Media-server*.
 6. Click the ***Configure TwonkyMedia*** icon on the desktop to start the configuration.
