PHILIPS

sense and simplicity

Highlights

Free internet radio stations

Streamium comes with thousands of free Internet radio stations. Now you can stay abreast of all kind of music worldwide.

Connect your Streamium to the Internet and listen to your favorite online programs on your audio system without having to turn on your PC.

Rhapsody® online music service

With the Streamium Network music player, you can instantly access millions of songs anytime through the Rhapsody? online music service. Stream your favorite songs to your Streamium without even having to turn on your PC. Just make sure that your Streamium is connected to the Internet. To try it out, Rhapsody? is giving you a free trial for 30 days!

LivingSound

Philips' patent-pending LivingSound vastly expands the sweet spot (the ideal listening

location in your room) so you can enjoy truly immersive music over a wider area. Combining various sound processes, LivingSound recovers the richness and spatial details of the soundstage that are often lost with a compact stereo system. The effect is a larger than expected sweet spot - one that is extensively and evenly distributed around the room. Now your music enjoyment is not confined to the traditionally narrow area anymore. Enjoy optimum stereo sound in a wider area.

FullSound™

Philips' innovative FullSound technology faithfully restores sonic details to compressed MP3 music, dramatically enriching and enhancing it, so you can experience CD music without any distortion. Based on an audio post-processing algorithm, FullSound combines Philips' renowned expertise in music reproduction with the power of the latest generation Digital Signal Processor (DSP). The

result is fuller bass with more depth and impact, boosted voice and instrument clarity, and rich detail. Rediscover your compressed MP3 music in true-to-life sound that will touch your soul and move your feet.

Wireless music playback

Free your entire music collection from your PC/Mac with the Streamium Network music player! With the UPnP connection that lets you connect to any Universal Plug & Play-enabled device to receive or transmit music; the Streamium enables you to access, select and search your music collection in your comp. Just use the remote control and choose your songs through the Streamium. Enjoy your favorite music wirelessly, effortlessly and with great sound quality. Philips' patented FullSound technology brings the CD listening experience to MP3 while LivingSound produces a wider, immersive stereo sound.

Specifications

Sound

- Equalizer settings: Classic, Jazz, Pop, Rock
- Music Power: 30 W
- Sound Enhancement: Equalizer, Dynamic Bass Boost
- Type: FullSound, LivingSound
- Volume Control: Volume Control up/down
