### Easy to use

- Dock any iPod/iPhone, even in its case
- Auto clock synchronisation with iPod/iPhone when docked
- Audio-in for easy portable music playback

### Contemporary retro design

- Contemporary reinterpretation of the iconic Philetta design

**PHILIPS**

# Highlights

## Play and charge your iPod/iPhone

Enjoy your favourite MP3 music while charging your iPod/iPhone! The dock lets you connect your portable device directly to the Docking entertainment system so you can listen to your favourite music in superb sound. It also charges your iPod/iPhone while it plays so you can enjoy your music and not have to worry about your portable player battery running out. The Docking entertainment system automatically charges your portable device while it is docked.

## Bass Reflex Speaker System

Bass Reflex Speaker System delivers a deep bass experience from a compact loudspeaker box system. It differs from a conventional loudspeaker box system in the addition of a

bass pipe that is acoustically aligned to the woofer to optimise the low frequency roll-off of the system. The result is deeper controlled bass and lower distortion. The system works by causing the air mass in the bass pipe to vibrate like a conventional woofer. Combined with the response of the woofer, the system extends the overall low frequency sounds to create a completely new dimension of deep bass.

## Dock iPod/iPhone in its case

Smartly designed spring-loaded docking port effortlessly accommodates any iPod or iPhone, without special adapters. What's more, it works even when most protective cases are on – just dock your iPod or iPhone as it is. Now you can truly have fuss-free enjoyment of your music.

## Auto clock synchronisation

When connected and docked, this docking system will automatically synchronise the clock with your iPod/iPhone within a few seconds. With this convenient feature, you do not need to set the time manually.

## AUDIO-IN (3.5 mm)

Make one easy connection and enjoy all your music from portable devices and computers. Simply plug your device into the AUDIO-IN (3.5 mm) port on your Philips set. With computers, the connection is typically made from the headset output. Once linked, you can enjoy your entire music collection directly, on a set of superior speakers. Philips simply delivers better sound.

# Specifications

## iPhone compatibility

- Compatible with: iPhone 5

## iPod compatibility

- Compatible with: iPod nano 7th generation, iPod touch 5th generation

## Audio Playback

- Playback mode: Charging iPod, Charging iPhone
