Highlights

Video chatting

On-line video chatting (communication) over a distance

V-mail software

Get started with sending video clips to friends and family in v-mails made using the software supplied.

CIF resolution snapshots

An image taken at CIF resolution produces an image of 352 by 288 pixels, meaning a small file size but with enough detail for fun snapshots for e-mailing and adding to web pages.

CIF at 30 fps video quality

Record with VGA (640x480) resolution at 30 frames per second video quality.

External microphone included

With a separate external microphone, you have the freedom to place it where it best picks up your voice for relaxed on-line video chatting.

VLounge control panel

VLounge control panel for quickly access your PC camera applications

XP Plug & Play

If you're a Windows XP end-user, you do not need to install product drivers before starting to use this PC peripheral / product.

USB Bus-powered

USB bus-powered devices draw the power they require directly from the USB bus so you don't need an additional power supply. This helps reduce the cable tangle on your desktop.

Cameras

Sensitivity: 10 lx
