Quick start guide

What's in the box

1. Install

Before you connect your player to your PC you need to install the software:

1. Insert the CD supplied with your product into the CD ROM drive of your PC.
2. Follow the onscreen instructions to complete the installation of Windows Media Player and Arcsoft MediaConverter.
3. If the installation program does not start automatically, browse the CD contents on Windows Explorer and run the program by double clicking on the file ending with .exe.

2. Connect

A. Record video

Your player can record your favorite TV programs.
1. Connect the AV cable to the Video-in jack of your player.
2. Connect the other end, with the yellow, white and red plugs to the matching colored A/V output jacks on your TV, cable box, satellite tuner or DVD recorder.
3. Turn on your player. On your player, select Recording menu. Press OK to start recording.
4. On your player, press to enter the main menu and select settings.
5. Select On and press OK.
> The progress will be displayed just above the progress bar.
6. Select Off and press OK again to stop recording.
> The recording will be saved under your videos.

You can also schedule recordings using the Timer Recording function. Consult the user manual on the CD for detailed instructions.

B. Playback on TV

You can play music, videos, and view pictures on your TV.
1. Connect the player to your TV as shown.
2. On your player, press (Menu) to enter the main menu and select settings.
3. Select Display from the settings menu.
4. Select TV-out.
5. Select On and press OK.
> A message will appear: To return display to the Portable Media Center, turn power off and then on.
6. On your TV, select the AV channel (Check your TV user guide for details on selecting AV input).
> You should see the menu of your player on your TV screen.

C. Connect to PC

You can connect your player to PC.
1. Turn on the player.
2. Connect the player to your computer using the supplied USB cable.
> The files will be stored in the Videos under Main Menu -> my videos folder of the player. You can see the result of the conversion (if needed) and transfer by checking My Computer > Philips PMC7230 > Media > Video when the player is attached to the PC.

D. Transfer video

1. Connect your player to the PC using the supplied USB cable.
> The progress will be displayed just above the Progress area.
3. Once your player is connected, it will show up as Philips PMC7230 in the box as shown.
4. In the Convert to: option at the bottom of the screen, select Current Device, the content will be stored directly on the connected player.
5. Press Add Media to select the Video files to be transferred.
6. Drag and drop your video files from Windows Explorer into the white box.
7. Press Convert.
> All the converted files will be transferred to the player.

E. Transfer music and pictures

1. Start Windows Media Player.
2. Connect the player to your computer using the supplied USB cable.
3. Select Sync tab to confirm that your player is connected.
4. In the pull-down menu on the right pane, select Philips PMC7230 as the destination.
5. If the player is not in the list, click F5 to refresh and try again.
6. Select the Library tab to access the media library.
7. Click to highlight the song or picture you want to copy.
8. Right click on the song and select Add to > Sync List.
9. Drag and drop the song into the Sync List on the right pane.
10. Click Start Sync button at the bottom of the screen to start synchronization.
> The progress will be displayed just above the Start Sync button.

3. Transfer

How do I reset my player?

Insert a small pin or a sharp object into the reset hole located at the back of the player under the desk stand. Hold until the player restarts.

Please refer to the user manual for more troubleshooting advice.
