## PSA200 Firmware upgrade procedure

1. Download the zip file from the site. Then unzip the file into a temp folder on your computer.

2. At Start->Programs->Nike->psa200, select and launch "Upgrader".

3. When the user starts the Upgrader with no device connected, the following screen is seen with the *Start* button disabled.

- The *Start* button is enabled only when the correct device is connected

```
psa200 Upgrader                                    [X]

  This Firmware Upgrade utility will upgrade the device with the latest firmware.
  Do you want to continue?

  Note : Please check www.nike-philips.com for the latest firmware upgrades

  [C:\Program Files\Nike\psa200\psa200.ebn        ]  [ ... ]

           [    Start    ]        [    Close    ]
```

- Click on the"…" button to browse and select the unzipped firmware file to be loaded into the device and then click open

- Place a fresh battery to the set and connected to the PC

- The user is informed that the device will be upgraded with the new firmware. On pressing OK, the firmware is loaded.

```
psa200 Upgrader                                                    [X]

  This program will upgrade the software on your psa audio player. Please ensure that the psa audio player is connected to your
  PC, and that the battery in it is not low.

              [    OK    ]    [  Cancel  ]
```

```
psa200 Upgrader                                                    [X]

  Please disconnect your device and restart it. It will upgrade to the new firmware

              [    OK    ]
```

- Disconnect the device so that the device upgrades to the new firmware

-Press the play key and the LCD display shows :" FUpgrade"
-Wait until the set switch off automatically.
-The set is then upgraded.
