

PHILIPS

Neurological pedal
set

ReCare

PTE7010MA

Added Stability for all patients

Gain extra support for feet & ankles

The 2.1 Neurological pedal set gives greater accessibility for patients with foot and ankle movement limitations. Patients can improve motor learning, range of motion, and strength building especially for neurological conditions.

More accessibility for neurological patients

- Hook and loop fastening straps keep feet firmly in place

Highlights

Straps

Heel cup and hook and loop straps secure foot placement. Allows users with foot and ankle limitations to benefit from a cycling workout.
