Neurological pedal  
set

ReCare

PTE7010MA

## Added Stability for all patients

Gain extra support for feet & ankles

The 2.1 Neurological pedal set gives accessibility for patients with foot and ankle movement limitations. Patients can improve motor learning, range of motion, and strength building especially for patients with neurological conditions.

### **More accessibility for neurological patients**

- Hook and loop fastening straps keep feet firmly in place

# Highlights

## Straps

Heel cup and hook and loop straps secure foot placement. Allows users with foot and ankle limitations to benefit from a cycling workout.
