# Highlights

## Unique OneBlade technology

The Philips OneBlade has a revolutionary technology designed for facial styling and body grooming. It can trim, edge and shave any length of hair. Its dual protection system – a glide coating combined with rounded tips – makes shaving easier and more comfortable. Its shaving technology features a fast-moving cutter (200 x per second) so it's efficient – even on longer hairs.

## Trim it down

Trim your beard to a precise stubble length with one of the four included stubble combs. 1 mm for a 5 o'clock, 2 mm for stubble, 3 mm for a tight trim and 5 mm for long stubble.

## Edge it up

Create precise edges with the dual-sided blade. You can shave in either direction to get great visibility and see every hair that you're cutting. Line up your style in seconds!

## Shave it off

OneBlade doesn't shave as close as a traditional blade – so your skin stays comfortable. Go against the grain and shave off any length of hair easily.

## Contour following

OneBlade follows the contours of your face, allowing you to effectively and comfortably trim and shave all areas of your face.

## Dual-sided blade

OneBlade follows the contours of your face, allowing you to easily and comfortably trim and shave all areas. Use the dual-sided blade to style your edges and create clean lines by moving the blade in any direction.

## 4 click-on stubble combs

Attach one of the click-on combs to get the even stubble length you want.
