HIGHLIGHTS

Cup warmer

This feature allows you to not only store your espresso cups and glasses right on the espresso machine, it also pre-heats them letting the aroma unfold even better and guaranteeing a long-lasting crema

Auto-cleaning and descaling

Saeco designed this espresso machine to automatically clean its coffee circuit with water when starting up or switching off to deliver a great, fresh taste with each cup of coffee. Regular descaling prolongs your espresso machine's life. This machine will not only prompt when descaling is needed, the automated descaling process will start and guide you with clear on-screen messages when you have to intervene. Descaling has never been so easy!

One-touch interface

The wide and easy-to-read display allows one-touch functionality and intuitive handling.

Classic milk frother

This Saeco espresso machine comes with the classic milk frother that baristas call a “Pannarello”. It dispenses steam and is immersed in milk to prepare gorgeous milk foam. Unleash your inner barista by preparing your delicious milk specialties the traditional way!

Removable brewing group

The brewing group, a Saeco invention, is the heart of our espresso machines, ensuring automation. The brewing group is, depending on the model, easily accessible from the front or side. It can be removed effortlessly for easy cleaning by rinsing under the tap, ensuring maximum hygiene.

SBS (Saeco Brewing System)

The Saeco automatic espresso machine exclusively allows you to adjust your espresso's intensity, altering the crema and body structure as it is dispensed. Simply by turning the knob you can prepare the crema exactly according to your taste. A little knob that makes a big difference.

Auto-lift drip tray

Gaggia's patented automatically adjustable drip tray will allow cups of all sizes to fit under your Espresso machine.
