Highlights

High resolution audio

High Resolution Audio offers the best in audio performance, reproducing original studio master recordings more faithfully than 16bit/44.1kHz CD formats. This uncompromising quality makes High Resolution Audio the best sound companion for the music lover. Fidelio headphones meet the stringent standards required for the Hi-Res Audio stamp of quality. Whether enjoying your Hi-Res collection or a more traditional music source, the smooth extended high frequencies of the Fidelio headphone range help you get more from your music.

13.5mm neodymium drivers

Each speaker driver is carefully hand picked, tuned and tested before being paired to ensure delivery of the most balanced, natural sound. The 13.5mm drivers utilize high power neodymium magnets to deliver deep bass impact, transparent mid-range and refined high frequencies.

Copper alloy outer housing

Copper alloy outer housing for lightweight durability

Engineered metal housing

The metal housing is meticulously engineered to reduce resonance and vibration, delivering authentically precise sound marked by incredible sound detail.

Handpicked, tuned and tested

Each speaker driver is specially tested and hand picked as ideal stereo pairs, together delivering

superbly deep bass, transparent mid-range and refined high frequencies.

High gloss coating

The ergonomically designed earshell is protected by a high-gloss finish, which not only imparts a premium look and feel but also durability and resistance to scratches. The protective coating makes the earphones easy to clean and even easier to bring along with you anywhere you go. Just a wipe and they'll look as good as new.

In-line control and mic

The Fidelio S2 in-ear headphones feature an in-line remote and microphone so you can switch easily between your music and calls. Stay connected with important people – and your music, always.
