Highlights

Airplane adaptor included

Use your own headphones to listen to in-flight entertainment. The adaptor simply converts the standard double-mono jacks to a stereo headphone jack.

Audio jack adaptor included

With this adaptor, you can use your headphone on equipment with either 3.5 or 6.35 mm jacks, giving you a wider choice of audio devices.

Battery included

No need to buy batteries to get started. Just drop the batteries in and go!

Carrying pouch included

Look after your headphone and stop the cable getting tangled by storing it in this handy soft pouch.

Small control box

The miniature electronics are cleverly packaged into the specially designed small control box.

Active Noise reduction

This smart noise reduction technology enhances the pleasure of listening to lower volume levels in noisy environments. It's particularly good at removing low-frequencies like jet engine noise, so you can enjoy soft music on flights, and in trains and similar places without hearing a distracting buzz in the background. The technology actually creates an equal but opposite waveform to the noise that that by a process of subtraction, effectively cancels out the unwanted noise.

Built-in Volume Control

A handy slider control that sets the loudness to the level you prefer.

Excellent sound quality

Acoustically-tuned design and high-quality drivers ensure best-in-class audio performance.

Neodymium magnets

Neodymium is the best material for producing a strong magnetic field for greater sensitivity in a voice coil, better bass response and higher overall sound quality.

Dual cone shaped ear-plug

This specially designed ear-plug provides the same high degree of comfort and fit regardless of the shape or size of your ear.

Neck strap

A comfortable and stable way to keep your headphones firmly in place by reducing the strain on the cable.
