

Philips
Network Extender

SBCLI1000

Control from any location

NetX, the ideal companion to your iPronto wireless control panel extends the reach of your control beyond boundaries.

The total control solution

- A single point for control for home automation systems
- Radio frequency works through walls and from other rooms

Connects to wireless networks

- Optional IR extension module controls hidden equipment
- Integrated WiFi connectivity for wireless networking

Easy to setup

- Control multiple devices with a single touch
- Intelligent setup wizard means no PC needed for installation

PHILIPS

Specifications

Connectivity

- Wireless LAN: 802.11b
- Encryption / security: WEP 128 bit
- Network mode: DHCP, Fixed IP
- IR emitter connectors: 4

Infrared Capabilities

- Operating distance: 33 ft (10 m)
- Transmitting LEDs: 5
- IR emitter connectors: 4

Customization

- Editor application on PC: iProntoEdit

Power

- Mains power: AC 100-240 V 50-60 Hz 500 mA

Dimensions

- Master carton quantity: 1
- Product dimensions (W x H x D): 160 x 85 x 33 mm
- Product weight: 0.2 kg
- Temperature range (operation): 5°C to 45°C

Accessories

- AC/DC Adaptor: 5 V 3 A
- Dual IR emitter wires: 4
- Quick start guide

Highlights

Home automation control

Control of not only Audio and Video devices but also other devices in the home such as Lighting, Climate, Curtains, etc.

Radio frequency

A radio technology that allows you to control components not in direct line-of-sight, such as through walls or other obstacles. There are two types of RF used in remote controls: RF to component, and RF to infrared.

IR extension module

An infrared extension module allows you to control traditional infrared equipment over a radio frequency network.

Integrated WiFi

WiFi networking, also known as IEEE 802.11 uses radio frequency signals to communicate in a similar fashion as wired computer networks. It uses TCP/IP networking protocols for the basic communication.

One-touch convenience

One-touch control allows you to perform multiple commands with one press of a button via a macro. A macro combines a string of pre-programmed commands under one single button. Therefore, it simply takes one button press to execute a series of functions.

Setup wizard

The setup wizard provides a step by step guide that tailors the device to perfectly match your home entertainment system. By learning what equipment you have, and how it is interconnected, the device creates its own macros that allow full control of your home entertainment system.
