## Two-in-one remote for all brands

Whatever combination of TV and VCR you choose, the Easy Touch Universal remote handles them all. It works on all European brands. Forget that table full of remotes!

## Pick it up and the buttons light up

Pick up your Easy Touch Universal and the buttons light up straight away - even before you press one. Tilt sensor backlighting adds extra convenience to viewing in the dark.

## Smart backlighting – see what you need to see

If you're controlling the TV, the TV controls glow. Switch to the VCR, and it's the VCR buttons you'll see. Smart backlighting makes it easier to control all your devices at night.

## Logical button layout for easy navigation

Zap through the channels, adjust the volume – even change your menu settings – with just one hand. All main buttons are within easy reach of your thumb. And they're extra large to make it a pleasure to use.

## Balanced shape feels right and looks good

The natural shape, perfect balance and smooth action of the Easy Touch Universal make it feel just right in your hand. And it looks great too. It's quality, elegance and ergonomics all rolled into one.

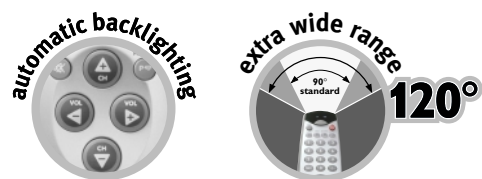

## Ready for use in seconds

The set-up procedure is so straightforward, you'll be controlling your complete video installation in seconds – whatever brands you use. And for Philips equipment, it's simply press and go! The unique Philips Simple System Setup™ featuring handsfree autosearch takes the hard work out of getting the remote ready for action.

## On target from almost anywhere in your room

An extra wide signal beam makes the remote much more relaxing to use. You don't have to direct it so accurately at the equipment, so it works from almost everywhere in the room.

## Easy Touch: remote convenience, comfort... and perfect control
