Highlights

4-in-1 remote control

Replace a table full of remote controls with one robust unit that operates your TV, DVD player/recorder, satellite receiver, digital terrestrial receiver or cable set-top box (STB) and VCR, regardless of the brand or model.

Functional backlighting

To make operation in a dark or dimly lit room easier, only the relevant keys for the currently selected mode are backlit.

Pre-programmed for Philips

If you have Philips equipment, you can use your universal remote control without programming it because all keys are pre-set for Philips.

Simple system setup

Setup your remote control as soon as possible with an intelligent scanning system that automatically scans for the codes that match your equipment.

Ergonomic design

The smooth rounded shape fits perfectly in your hand for natural, balanced operation. It looks great too!

Controls Channel and Volume

You can step up and down through the most popular functions like channel selection and volume using large distinctive keys, making zapping both comfortable and convenient.

Fast menu access

The important functions like setup menu and text TV have clearly labelled, dedicated keys to make operating your equipment easier.

Wide angle operation

The extra wide signal beam makes the remote control much more relaxing to use. You can control your equipment from virtually every position in your room without having to accurately aim the remote.

Automatic backlighting

No more searching for buttons in the dark, because when you pick up the remote control, the keys (or LCD display) automatically light up.
