

PHILIPS

Baby Monitor

SBCSC361

Pilot tone technology included

Wireless Baby Monitor that enables parents to be in constant contact with their baby.

Reliability & Piece of mind

- More transmission channels lowers the risk of interference
- Analog Pilot Tone minimizes interference from other devices
- Battery low indication shows when to refresh batteries

Extra portability

- Portable parent unit due to the adjustable belt clip.

Flexibility in monitoring your child

- Take the parent unit with you in and around the house
- Maximum operating distance between units with no obstacles

Convenience for you and your child

- Simplifies the selection of the volume you prefer

Highlights

Number of channels

A choice of channels significantly reduces the risk of interference or sounds from other baby monitors in the neighbourhood.

Analogue Pilot Tone

A special tone that is transmitted along with the audio signal minimizes the chance of interference from other wireless appliances.

Battery-low indication

To know in time when the batteries need to be recharged or replaced.

Portable parent unit

With the adjustable belt clip, you can easily take the parent unit with you, wherever you go.

Use in & around the house

Rest assured that as you take the parent unit with you as you move in and around your house, the parent unit will stay in touch with the baby unit. It keeps you reassuringly informed and able to respond quickly when baby calls.

Range in open air

In the open air with no obstacles, the safe distance between the baby unit and parent unit is greater than indoors, so you can take the parent unit with you into the garden or to the neighbour's house without losing contact.

Volume control

A handy rotary control sets the volume to the ideal level to suit your preference.
