- **Battery type:** LR41
- **Number of batteries:** 2
- **Operating time on battery:** 200 hr
- Removable/ replaceable

Technical specifications

- **Operating temperature range:** 32-44 °C
- **Accuracy:** 36.5-39.0C:±0.1C
- **Measurement time:** 10 s

Product highlights

Digital body thermometer

Fast, reliable and accurate digital thermometer for measuring the baby's temperature.

Measure within seconds

Never too hot, never too cold - the "Just Right" digital thermometer quickly tells you if the milk or food is safe to eat or drink. It takes the guessing out of warming bottles or jars and is great for checking if food is still warm enough after taking a short break in feeding.

Detachable electronics

By detaching the sensitive temperature measuring electronics from the pacifier, you can safely sterilise or boil the part your baby comes into contact with.

Sterilise nipple

Thanks to the special material, you can safely sterilise the pacifier's nipple in a microwave oven or electrical steriliser or boil it without harming the pacifier.

Dimpled shield on soother

Dimples make sure air flows behind the soother to protect your baby's sensitive skin from irritation.

Orthodontic Silicon Nipple

The soother's specially shaped silicon nipple is orthodontically designed to fit your baby's mouth and will not inhibit natural development. Use it with confidence to pacify your baby.

Dummy Soother included

You can put the soother regularly in your baby's mouth to stimulate him or her to get used to it. It works like any regular soother.
