- Extra-long cord

SC1999/00

Gentle, long-term hair reduction

Philips Lumea Advanced works wonders to prevent the reappearance of body and facial hair. When applied regularly, the gentle pulses of light keep skin silky-smooth every day.

Benefits

Long-lasting hair removal with IPL technology

- Adapted for safe and effective use in your own home
- Enjoy smooth skin every day
- Effortlessly effective
- Suitable for a wide variety of hair and skin types

Safe, fast and effective on your body, face and bikini

- Safe and effective even on sensitive areas
- Large treatment window for fast application
- Precision attachment for extra safety on the face

- Attachment for specialised treatment of bikini area hair
- Integrated skin tone sensor
- Gentle treatment

Maximum freedom, minimum hassle

- No replacement parts, no hidden costs
- Slide and Flash mode for more convenient application
- Five adjustable light energy settings

PHILIPS

Features

IPL technology

Philips Lumea uses an innovative light-based technology called IPL (Intense Pulsed Light), derived from the technology used in professional beauty salons. Philips has adapted this technology for safe and effective use in the comfort of your own home. Philips worked closely with leading dermatologists to develop our breakthrough hair removal system. For more than 10 years we carried out extensive consumer research with more than 2000 volunteers.

Enjoy smooth skin every day

Philips Lumea applies gentle pulses of light to the hair root. As a consequence, the amount of hair your body grows gradually decreases. Repeating the treatment leaves your skin beautifully hair free and touchably smooth.

Effortlessly effective

Our clinical studies have shown significant hair reduction in as little as four fortnightly treatments resulting in smooth hair free skin. To maintain these results, simply repeat the treatment when needed. Time between treatments may vary based on your individual hair regrowth. - To enlarge this picture, please click on the image in the image gallery on the top of this page

Suitable hair and skin types

Philips Lumea works effectively on (naturally) dark blonde, brown and black hairs. As with other light-based treatments, Philips Lumea is NOT effective on red, light-blond or white/grey hair. This product is also NOT suitable for dark skin.

Application areas

Use with confidence to remove hair on the face (upper lip, chin and sideburns) and body parts including the legs, underarms, bikini area, belly and arms.

Fast treatment on legs

Big treatment window for fast application on large areas like legs.

Extra safety for the face

With the additional integrated light filter, it can be used for safe treatment of facial hair on the upper lip, chin, cheeks and other sensitive areas.

Bikini area attachment

Bikini area attachment for effective treatment of bikini hair. Hair in this area tends to be typically stronger and thicker than leg hair.

Skin Tone Sensor

For safety, the integrated skin tone sensor measures the treated skin complexion at the beginning of each session and occasionally during the session. If it detects a skin tone that is too dark for this product, it will automatically stop emitting pulses.

Lumea Advanced

Gentle treatment

Gentle on your skin.

No replacement parts needed

Philips Lumea is a complete solution that comes ready to work straight out of the box. More importantly, it does not require any replacement lamps or gels.

Slide and Flash mode

Main application mode enables sliding motion for more convenient and continuous application.

Five light energy settings

Philips Lumea has five adjustable light energy settings to ensure gentle but effective treatment. Used correctly, Philips Lumea's IPL treatment is safe and gentle to use even on sensitive skin and sensitive body areas.
