SatinLux

SC2000

## Enjoy smoothness forever

For effective hair re-growth prevention

Philips SatinLux photo-epilator uses gentle pulses of light to stimulate the hair root into a resting phase. As a result, hair sheds naturally and re-growth is inhibited. Using it every two weeks enables you to enjoy smooth skin forever.

### **Effective hair regrowth control**

- Enjoy smooth skin everyday

### **Intense Pulsed Light (IPL) technology**

- Suitable for home use

### **Gentle application**

- Even on sensitive skin and sensitive body areas

### **Rechargeable battery**

- With quick charge functionality

### **Application areas**

- Underarms, bikini area, legs, arms and stomach

# Highlights

## Hair regrowth control

Philips Lumea applies gentle pulses of light to the hair root. As a consequence the hair sheds naturally and hair regrowth is inhibited.

Repeating this treatment every two weeks for the underarms, bikini area, arms and stomach and every four weeks for legs will keep your skin smooth everyday. For a most effective treatment pre-shave the application area as long as you still experience regrowth (first treatments only).

## IPL technology

Philips Lumea works with an innovative light-based technology called "Intense Pulsed Light" (IPL) derived from technology used in professional beauty salons for hair removal. Philips Lumea now brings this innovative new technology, suitable for home use, to be used by you wherever and whenever you want.

## Safe and gentle application

Philips Lumea has five adjustable light energy settings to ensure gentle but effective treatment. Used correctly, Philips Lumea's IPL treatment is safe and gentle to use even on sensitive skin and sensitive body areas. The treatment time and battery recharge frequency depends on chosen energy setting and the application area.

## Application areas

Philips Lumea has been developed in close cooperation with leading dermatologists for a safe, effective and gentle application on underarms, bikin area, legs, arms and stomach.

## Suitable hair and skin types

Philips Lumea works effectively on (naturally) dark-blond, brown and black hair. Philips Lumea is NOT effective for (naturally) red, grey and light blond hair. Philips Lumea is NOT suitable for very dark skin (skin type VI)

# Specifications

## Features

**3cm<sup>2</sup> application window:** for an effective treatment of large areas

**5 light energy settings:** adjustable to your personal skin type

**integrated UV-filter:** protects your skin from UV-light

**Ready-to-flash light:** indicates a correct application on the skin

## Accessories
