# Highlights

## Air Lift System

The vacuum massage intensively stimulates microcirculation. Skin is gently lifted and stretched, massaging its deeper layers. Blood flow increases, bringing oxygen and nutrients to the surface. For a revitalized look. VisaCare is designed to be in the sweetspot of stretch required to stimulate collagen and elastin production. For a firmer feel in 4-6 weeks time.

## Exfoliating tip

The exfoliating tip gently removes part of the stratum corneum (the upper layer of the skin) and thickens the epidermis (the second layer of the skin) unveiling skin that feels smoother and looks radiant. It gently nudges away roughness and flakiness more effectively and controlled than manually possible. Skin is stimulated to renew cells. For a firmer feel in 4-6 weeks time.
