Gift set

Newborn Starter Set
bottles with AirFree vent
Pink

SCD393/04

Designed to reduce colic, gas and reflux*

Our unique AirFree vent is designed to help your baby swallow less air as they drink by keeping the nipple full of milk during feeding. Reducing the amount of air your baby ingests helps w/common feeding issues such as colic, reflux & gas.

AirFree vent designed for less air ingestion

- Nipple stays full of milk, not air
- Helps baby swallow less air with AirFree vent

Additional benefits

- Easy to clean - wide neck & few parts
- AirFree vent is one piece, simple to use
- Use your bottle with or without the AirFree vent
- Different nipple flow rates available
- Mix and match with other Philips Avent products
- Dispenser holds enough formula for three 9oz/260ml feeds
- Orthodontic, symmetrical and collapsible pacifier nipple

Clinically proven to reduce colic and fussing*

- Valve in the nipple prevents vacuum build-up*
- Nipple shape designed for a secure latch

Highlights

Nipple full of milk, not air

The nipple stays full even when the bottle is horizontal, so your baby can drink in an upright position. This can help reduce reflux, aid digestion, and make feeding time more comfortable for you and your little one.

Unique venting system

Our unique AirFree vent is designed to help your baby swallow less air as they drink, by drawing air away from the nipple. Reducing the amount of air your baby ingests can help with common feeding issues, such as colic, reflux and gas.

Easy to clean

With its wide neck and fewer parts, our bottle is easier to assemble and to clean quickly and thoroughly.

Reduces colic and fussing*

Clinical studies have shown that the Philips Avent bottle reduces colic and fussing. Fussing is significantly reduced at night as babies fed with Philips Avent anti-colic bottles experienced 60% less fussing than babies fed with a leading competitor's vented bottle.

Simple to use

While feeding, make sure the AirFree vent stays on top. This keeps the nipple full of milk, even when the bottle is held in a horizontal position, for easier upright feeding.

Freedom of choice

You can use your Philips Avent Anti-colic bottle with or without the AirFree vent. The AirFree vent is compatible with all of our Philips Avent Anti-colic bottles.

Designed for a secure latch

The shape of the nipple allows for a secure latch, and the ribbed texture helps prevent nipple collapse, for uninterrupted, comfortable feeding.

Choosing the right nipple

Different flow rates to keep up with your baby's growth. The Philips Avent Anti-colic bottles can be used with or without the AirFree vent - but they should only be used with Philips Avent Anti-colic feeding nipples.

Ease of use: Easy to clean and assemble, Few parts for easy assembly

Compatibility: Full Classic+ compatibility

* Our unique AirFree vent is designed to help your baby swallow less air as they drink by keeping the nipple full of milk during feeding. Reducing the amount of air your baby ingests helps w/common feeding issues such as colic, reflux & gas.

* At 2 weeks of age, babies fed with a Philips Avent bottle showed a trend to less colic compared to a conventional bottle and a significant reduction in fussing at night compared to babies fed with another leading bottle.

* What colic is, and how it affects babies? Colic is caused in part by swallowing air while feeding, which creates discomfort in a baby's digestive system. Symptoms include crying, fussing, gassiness and spit-up.
