

Philips Avent ultra soft and ultra air pacifiers

Our ultra soft, flexible shield follows the shape of your baby's cheeks, leaving fewer marks and causing less skin irritation for more comfortable soothing.

Let your little one's skin breathe with the Philips Avent ultra air pacifier. The lightweight shield is designed for maximum air flow so your baby's sensitive skin stays drier while soothing.

With our carry case you can sterilize your baby's pacifier in the microwave and store hygienically when you're on the move.

Our eco passport

Philips wants to make the world healthier and more sustainable. To make this a reality, we have to keep thinking differently; pushing the boundaries of what is currently believed possible. We continuously innovate and deliver products and technologies that are positive for people and the environment. At Philips we call this Green Innovation.

We know this is important to you too. So we have developed an eco passport which explains the environmental performance of our products in the Philips Green Focal Areas, developed through our eco design process since 1994, enabling you to make conscious, informed decisions. An eco passport will explain the Green Focal Areas considered and applied in the specific product.
