

PHILIPS

AVENT

AirFree™ vent

2 pcs

SCF411/02

Designed to reduce colic, wind and reflux*

Our unique AirFree™ vent is designed to help your baby swallow less air as they drink by keeping the teat full of milk during feeding. Reducing the amount of air your baby ingests helps with common feeding issues such as colic, reflux and wind.

Designed for less air intake

- Locks milk in, keeps air out, for easy upright feeding
- Teat stays full of milk, not air

Easy to use -- and clean!

- Easy to clean & assemble, as AirFree™ vent is a single piece
- Simple to use

Additional benefits

- Compatible with all sizes of Philips Avent Anti-colic bottles

Highlights

Locks milk in, keeps air out

The teat stays full of milk, even when the bottle is horizontal, so your baby can drink in a more natural, upright position. This can help reduce reflux, aid digestion and make feeding time more comfortable for you and your little one.

Easy to clean and assemble

The AirFree™ vent can be easily assembled with any Philips Avent Anti-colic and Classic+ bottle. Also, as the vent is one single piece, cleaning is a breeze.

Simple to use

To start, fill the bottle with milk, place the AirFree™ vent over the rim, and screw on the teat. Tilt the bottle downwards once to fill the

teat, and you're ready to go. When feeding, make sure that the AirFree™ vent stays on top. The teat will stay full of milk, even when it's horizontal, for easier upright feeding.

Compatibility

The Philips Avent AirFree™ vent is compatible with our 125 ml (4 oz), 260 ml (9 oz) and 330 ml (11 oz) Philips Avent Anti-colic bottles. The AirFree vent is not compatible with the Natural bottles.

Designed for less air intake

Our unique AirFree™ vent draws air away from the teat, so your baby swallows less air as they drink. This can help reduce common feeding issues such as colic, reflux and wind.

Specifications

What is included

AirFree™ vent: 2 pcs

AirFree™ vent

Material: PBT & LSR

Ease of use

AirFree™ vent: Dishwasher & microwave safe, easy to assemble and clean

Development stages

Stage: 0-6 months

Functions

Ease of use: Easy to clean and assemble, 1 piece for easy assembly

Compatibility: Full Anti-colic and Classic+ bottle compatibility

* The AirFree™ vent is designed to help your baby swallow less air. The teat stays full of milk, even when horizontal, for upright feeding. Reducing the air a baby ingests can help ease common feeding issues like colic, wind and reflux.

* At 2 weeks of age, babies fed with a Philips Avent bottle tended to develop less colic compared to conventional bottle feeding and a significant reduction in fussing at night compared to babies fed with another leading bottle.

* What is colic, and how does it affect babies? Colic is caused in part by swallowing air while feeding, which creates discomfort in a baby's digestive system. Symptoms include crying, fussing, wind and spit-up.
