# Highlights

## 2oz/60ml bottle container

A smaller size bottle to help ensure the appropriate amount for baby's smaller tummy

## Slower flow nipple

A smaller hole size delivers a more controlled flow rate for slower drinking babies. The Natural First nipple is the ideal flow rate to start bottle feeding your baby.

## Soft, textured nipple

The softer, textured teat more closely resembles the breast.

## Advanced anti-colic valve

Innovative twin valve designed to reduce colic and discomfort by venting air into the bottle and not baby's tummy.

## Natural latch on

The wide breast shaped nipple promotes natural latch on similar to the breast, making it easy for your baby to combine breast and bottle feeding.

## Simple to use and clean

Wide bottle neck makes filling and cleaning easy. Only a few parts for quick and simple assembly.

## Unique comfort petals

Petals inside the nipple increase softness and flexibility without nipple collapse. Your baby will enjoy a more comfortable and contented feed.

## Ergonomic shape

Due to the unique shape, the bottle is easy to hold and grip in any direction for maximum comfort, even for baby's tiny hands.
