Highlights

Neodymium magnet

Neodymium is the best material for producing a strong magnetic field for greater sensitivity in a voice coil, better bass response and higher overall sound quality.

Twin vents

Specially designed vents that channel the air balance the high tones and bass for a more rounded listening experience.

15 mm speaker driver

Small enough for optimum wearing comfort and big enough to deliver crisp, non-distorted sound, the 15 mm speaker driver is an ideal size for listening enjoyment.

Interchangeable caps

Choose one of the three interchangeable earpiece cap sets, each with different styling and colours, to suit your taste and mood.

Flexi-Grip design

A soft, flexible part protects the cable connection from damage that otherwise would occur due to repeated bending.

Mic friendly headphones

The cable length of these headphones is designed to optimize sound pick up from the microphone of your headset connector. It also optimizes overall cable length of these headphones combined with a headset connector. Headset connectors allow the use of standard headphones (without a mic and with a standard 3.5mm headphones plug) with a mobile phone. They often come with mobile phones but can also be purchased separately. For most mobile phone brands Philips SHH1XXX headset connectors are available. It also optimizes overall cable length to the mobile phone.

Split cable

This standard cable has a 3.5mm socket on one end and a 3.5mm plug on the other for extending your freedom of movement with headphones.
