## Highlights

### In-line remote with mic

Want to skip a track? Change the volume? Accept or reject a call? Record a voice memo? The remote features a sensitive mic as well as volume controls, call and skip functions. It can also trigger voice control. With this headset control is at your fingertips - no need to keep your iPhone or iPod accessible or to unlock the screen.

### Twin vents

Specially designed vents that channel the air balance the high tones and bass for a more rounded listening experience.

### Air cushioned caps

Air in between the cap and the driver gives you a soft feel like a pillow as it reduces the pressure on your ears.

### Flexi-Grip design

A soft, flexible part protects the cable connection from damage that otherwise would occur due to repeated bending.
