Highlights

For most directional sound

Angled Acoustic Pipe is designed according to the curvature of the human ear canal so that sound waves from the speaker are directed precisely to your ear drum with the highest definition

For best sound at low volume

You don't have to turn up the volume in noisy places any more. Angled Acoustic Pipe and the perfectly sealing ear buds cut off background noise significantly, delivering the same quality sound at a lower volume and with a longer battery life.

Ear fitting design

The design superiority of a slight 15-degree tilt in the Angled Acoustic model based on the anatomy of the human ear achieves a natural fit and supreme comfort.

3-size ultra-soft silicone cap

Available in three different sizes (small, medium and large), the interchangeable ear caps ensure a personalised fit for each individual user. They are also made from ultra-soft silicone to provide the utmost comfort for prolonged listening.

Soft silicone cushions

With their soft silicone cushions that fit gently in your ears, they provide hours of wearing comfort

1.2 m cable

The ideal cable length to give you the freedom to put your audio device where you want.

Rubberised cable relief

To extend product life, soft rubber between headphones and cable protects cable connection from damage through repeated bending.

Sensitive and sleek microphone

Sensitive and sleek microphone for picking up your voice clearly

3.5 mm stereo connector

3.5 mm stereo connector for Blackberry, HTC, iPhone, LG, Motorola and Palm

Extra 3.5 mm connector

Extra 3.5 mm stereo connector for Nokia, Sony Ericsson and Samsung

In-line vol and call control

Want to change the volume? Accept or reject a call? The remote features volume and call controls. With this headset, control is at your fingertips!
