# PHILIPS

Headset for iPhone with remote and mic  
Over-ear Black

## Highlights

### 1.2m cable

The ideal cable length to give you the freedom to put your audio device where you want.

### 40 mm speaker driver

The 40 mm speaker driver is made of a composite mylar material for a highly sensitive yet powerful element that delivers sound without audible distortion.

### Carrying pouch included

Look after your headphone and stop the cable getting tangled by storing it in this handy soft pouch.

### Closed type design

Sounds around you are perfectly blocked out while the sound from the headphone is kept in a sealed chamber for perfect quality. This makes the headphones great for monitoring during live music or recording sessions.

### Comfortable for long wear

The deluxe super soft ear cushions enable you to wear your headphones for as long as you like without discomfort.

### Flexi-Grip design

A soft, flexible part protects the cable connection from damage that otherwise would occur due to repeated bending.

### Self-adjusting inner headband

Typically headphones worn outdoors are adjustable by sliding an extendable headband into position. This can be cumbersome as it usually has to be done every time you use it. Get your music fix faster and easier with these headphones' flexible, self-adjusting inner headband. It will automatically adjust to your head's shape and size.

### In-line remote with mic

Want to skip a track? Change the volume? Accept or reject a call? Record a voice memo? The remote features a sensitive mic as well as volume controls, call and skip functions. It can also trigger voice control. With this headset control is at your fingertips - no need to keep your iPhone or iPod accessible or to unlock the screen.
