Highlights

90% less external noise

Smart noise canceling technology and angled acoustic design enhances the pleasure of listening to lower volume levels in noisy environments. It's particularly good at removing low-frequencies like jet engine noise, so you can enjoy soft music on flights, and in trains.

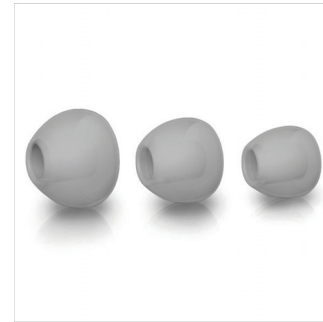

For most directional sound

Angled Acoustic Pipe is designed according to the curvature of the human ear canal so that soundwaves from the speaker are directed precisely to your ear drum with the highest definition

Angled acoustic fit

Derived from a thorough understanding of the anatomy of a human ear canal, the Angled Acoustic design adjusts the angle of the speaker tube and ear bud to individual ear canal shapes. It fits your ears naturally.

For optimal fit in all ears

With a choice of 3 interchangeable ear caps from size small to large, surely there is a pair that makes these Philips earphones fit your ear perfectly.

Powered by iPod

There is no need for you to carry extra battery pack. For extra convenience this noise canceling headphones are designed to get power directly from your iPod.

Control iPod

With the in-line control, you can easily control volume up/ down, skip previous/ next track, fast forward/ rewind, play and pause your iPod. It allows single hand operation and guarantees a unique user experience.

For details & dynamic sound

The acoustics of the headphones are precisely engineered according to the sound profile of in-flight sound system, to reproduce every little detail and the widest dynamic range.
