## Product highlights

### Analogue Pilot Tone

A special tone that is transmitted along with the audio signal minimises the chance of interference from other wireless appliances.

### Low battery indication

To know in time when the batteries need to be recharged or replaced.

### Range in open air

In the open air with no obstacles, the safe distance between the baby unit and parent unit is greater than indoors, so you can take the parent unit with you into the garden or to the neighbour's house without losing contact.

### Use in & around the house

Rest assured that as you take the parent unit with you as you move in and around your house, the parent unit will stay in touch with the baby unit. It keeps you reassuringly informed and able to respond quickly when baby calls.

### Volume control

A handy rotary control sets the volume to the ideal level to suit your preference.
