

Philips
Wireless Range Extender

11b/g True Turbo

SNR6500

Smart and simple wireless broadband

Extend the reach of your network

Philips Wi-Fi products enable you to send, direct and receive wireless signals and unleash the full potential of your connected home. Access computers, other Wi-Fi-compliant devices and a broadband connection to enjoy your favorite content.

Extend your wireless home network

- Extend the range of your wireless devices
- Increases signal strength in hard to reach areas
- Constant high-speed wireless connection

Easy to install

- Set-up wizard guides you through installation
- Internet and local phone support
- Set-up options for basic or advanced installation

Safe and secure connection

- High level security protection
- Advanced firewall protection
- Parental control options

Wireless freedom

- Wireless networks bring flexibility
- Access Internet, files, music and more anywhere in the house

PHILIPS
sense and simplicity

Wireless Range Extender

11b/g True Turbo

Specifications

Connectivity

- **Data transfer speed:** 54Mbps and 108 Mbps True Turbo
- Plug & Play
- **Wireless connections:** Wireless LAN(802.11b/g)
- **Wireless LAN:** 802.11b/g
- **WLAN security support:** WEP, WPA, WPA2

Tuner / Reception / Transmission

- **Frequency range:** Operates on 2.4 GHz MHz

System Requirements

- CD-ROM drive

- **PC OS:** Windows 98SE, ME, 2000, XP
- **Mac OS:** 9-X and higher

Technical specifications

- **Complies with:** Wi-Fi Certified

Accessories

- AC/DC adaptor
- **CD-ROM:** Installation CD-ROM
- Quick start guide
- **User manual:** yes, on CD-ROM

SNR6500/05

Product highlights

Extend your Wi-Fi range

This Philips Wireless Range Extender will bring you cost savings in wiring and helps to build wireless infrastructure by extending Wi-Fi signals into distant locations, reflective corners and hard to reach areas where wireless coverage is spotty and cabling is impractical. The Wireless Range Extender is perfect to cover large areas in multi-level homes, warehouse environments, anywhere you need extra coverage for your wireless network.

Increase WiFi signal strength

Constant high-speed

High speed performance allows extremely fast data transport and data access. This might avoid longer waiting times to access data of any kind.

Set-up wizard guides you

The setup wizard provides a step by step guide that helps you with the installation of your Philips Wireless Base Station. After installation your home network is ready to connect to all other Wi-Fi equipment in the house.

Internet and phone support

You can check out the Internet or call in for support for any questions you have regarding the product. Local languages are supported both on Internet and phone services. The Philips Internet support site has a forum where you can find additional information and the answers to most asked questions.

Set-up options basic-advanced

The Philips Wireless Base Station shows in the web based interface the option basic or advanced. With choosing one of the selections you will be automatically guided through the settings of the base station. The program will give you quick installation and connection. Advanced installation will guide you through multiple settings such as Wireless, Firewall, parental control etc..

High level security protection

Wireless security provided by Wi-Fi. In some instances, WAP, WEP or Tkip may be all you need to protect wireless data. WEP is available in 40-bit (also called 64-bit), or in 108-bit (also called 128-bit) encryption modes. As 108-bit encryption provides a longer algorithm that takes longer to decode, it can provide better security than basic 40-bit (64-bit) encryption.

Advanced firewall protection

A firewall is a program that runs constantly in the background of the Philips Wireless Base Station. The firewall protects your network from Internet attacks. Setting as FTP, DMZ and many more can be set via the easy setup wizard

Parental control options

The Philips Wireless Base Station employs the basic parental control features of URL blocking, Domain blocking, and IP address blocking. It can be effectively employed quickly through the intuitive web-based configuration interface of the Philips Wireless Base Station. Multiple filter features are supported when accessing the Internet, based on a site's domain name, URL, and/or IP address.

Wireless brings flexibility

Wireless gives you the ability to install PCs or clients in the house wherever you want. Laptop users can even sit in the garden and be on-line with the office, Internet or home network.

Connects to any Wi-Fi device

Wi-Fi certification ensures that you can communicate with all other Wi-Fi products. The Wi-Fi committee exists of Philips, Microsoft, IBM, Dell and some others that set industrial standards.
