What’s in the box

Philips Digital PhotoFrame

AC power socket

Memory card/USB

Stand

Computer

AC-DC power adaptor

CD-ROM,  
• Digital User Manual  
• Auto Run software

Quick Start Guide
1 Get started

Control buttons

1.  
   - Turn on/off the PhotoFrame

2.  
   - Toggle between slideshow mode, thumbnail mode, and main menu

3.  ▲/▼/◄/►  
   - Select the previous/next/right/left option

4.  
   - Play photos in slideshow mode, browse mode, or clock mode
   - Pause slideshow
   - Confirm a selection

5.  
   - Enter/Exit photo menu

Install the stand

To place the PhotoFrame on a flat surface, attach the supplied stand to the back of the PhotoFrame.

1. Insert the stand into the PhotoFrame.

2. Screw the stand into the stand hole firmly.

Connect power

Note

- When you position the PhotoFrame, ensure that the power plug and outlet are easily accessible.

1. Connect the power cord to the DC socket of the PhotoFrame.

2. Connect the power cord to a power supply socket.
Turn on the PhotoFrame

1 Press and hold 0 for more than 1 second.  
   Photos are displayed in slideshow mode.  
   • To turn off the PhotoFrame, press and hold 0.

Caution
Do not remove a storage device when files are transferring from or to the storage device.

Connect a storage device

You can play JPEG photos in one of the following storage device which is connected to the PhotoFrame:  
• Secure Digital (SD)  
• Secure Digital (SDHC)  
• Multimedia Card (MMC)  
• xD card (xD)  
• Memory Stick (MS)  
• Memory Stick Pro (with adaptor)  
• USB memory drive
   However, we do not guarantee the operations for all types of memory card media.

For xD/SD/MMC/MS/MS Pro card, insert it into the slot until you hear a “CLICK”.  
• For USB memory drive, insert it firmly.

Photos in the storage device are displayed in slideshow mode.

To remove a storage device:  
• For xD/SD/MMC/MS/MS Pro card, push the card inward and then pull it out.
• For USB memory drive, pull it out from the PhotoFrame.
2 Play

Play photos

1 In the main menu, select [Photo] and then press to confirm.

2 Select a photo source, and then press to confirm.

3 Select a photo, and then press to confirm.

Display collage photos

1 In the main menu, select [Setup] and then press to confirm.

2 Select [Collage], and then press to confirm.

3 Select [Random], and then press to confirm.

• To disable collage function, select [Off] and then press to confirm.
3 Setup

Select an on-screen language

1 In the main menu, select [Setup] and then press \(\text{OK}\) to confirm.

2 Select [Language], and then press \(\text{OK}\) to confirm.

3 Select a language, and then press \(\text{OK}\) to confirm.

Select a photo background

1 In the main menu, select [Setup] and then press \(\text{OK}\) to confirm.

2 Select [Background], and then press \(\text{OK}\) to confirm.

3 Select an option, and then press \(\text{OK}\) to confirm.
   
   If you select a background color, the PhotoFrame displays a photo with a background color.

   If you select [Auto Fit], the PhotoFrame extends a photo to fill the screen with picture distortion.
If you select [RadiantColor], the PhotoFrame extends the color on the edges of a photo that is smaller than the full screen to fill the screen without black bars or aspect ratio distortion.

Set display auto on/off

You can configure the time for the PhotoFrame to turn on or off the display automatically.

Note

- Ensure that you set the current time and date of the PhotoFrame before you set the auto on/off function.

1. In the main menu, select [Setup] and then press \( \text{D} \) to confirm.

2. Select [Auto Dim], and then press \( \text{D} \) to confirm.

3. Select [Auto Dim - End] / [Auto Dim - Start], and then press \( \text{D} \) to confirm.

4. Press \( \text{D} / \text{D} / \text{D} / \text{D} \) to set time for auto-on/auto-off, and then press \( \text{D} \) to confirm.

5. Select [Auto Dim Timer], and then press \( \text{D} \) to confirm.
6. Select [On], and then press \[\checkmark]\ to confirm.
   - To set off auto-on/auto-off function, select [Off] and then press \[\checkmark]\ to confirm.

Set time and date

1. In the main menu, select [Clock] and then press \[\checkmark]\ to confirm.

2. Select [Time and Date], and then press \[\checkmark]\ to confirm.
   - Select [12/24 hr] > [12HR] / [24HR], and then press \[\checkmark]\ to confirm.

Show clock in slideshow

1. In the [Time and Date] menu, select [Slideshow Clock] and then press \[\checkmark]\ to confirm.
   - Press \[\uparrow/\downarrow/\leftarrow/\rightarrow]\ to set time/date, and then press \[\checkmark]\ to confirm.
2 Select [Yes], and then press \( \Rightarrow \) to confirm.

3 Select [Time], and then press \( \Rightarrow \) to confirm.

4 Press \( \uparrow/\downarrow/\leftarrow/\rightarrow \) to set time for an alarm clock, and then press \( \Rightarrow \) to confirm.

5 Select [Day] for an alarm clock, and then press \( \Rightarrow \) to confirm.

6 Selection an option, and then press \( \Rightarrow \) to confirm.

→ You can have clock shown in slideshow.

**Set alarm clock**

**Note**

- Ensure that you set time and date of your PhotoFrame correctly.

1 In the main menu, select [Clock] and then press \( \Rightarrow \) to confirm.

2 Select [Alarm Clock], and then press \( \Rightarrow \) to confirm.

→ The [Alarm Clock] menu is displayed.
7 Select [On/Off], and then press \( \Rightarrow \) to confirm.

To set off an alarm clock, select [Off] and then press \( \Rightarrow \) to confirm.

8 Select [On], and then press \( \Rightarrow \) to confirm.
- To set off an alarm clock, select [Off] and then press \( \Rightarrow \) to confirm.
Frequently asked questions

Is the LCD screen touch-enabled?
The LCD screen is not touch-enabled. Use the buttons on the back to control the PhotoFrame.

Will the LCD be damaged, if I keep showing the same photo for a long time?
No. The PhotoFrame can display the same photo continuously for 72 hours without any damage to the LCD screen.

Why does my PhotoFrame not show some of my photos?
The PhotoFrame supports only JPEG photos. Ensure that these JPEG photos are not damaged.

Why does the PhotoFrame not go into auto-off status after I set it?
Ensure that you set the current time, auto-off time, and auto-on time correctly. The PhotoFrame automatically turns off its display exactly at the auto-off time. If the time has already passed for the day, it starts to enter auto-off status at the specified time from the next day.

Can I use the PhotoFrame during its display auto-off periods?
Yes. You can press \( \bigcirc \) to wake up the PhotoFrame.
